U.S. Drug Test **Set for Airlines**

WASHINGTON (AP) -The Transportation Department will impose a broad, random drug-testing program on the aviation industry, propose similar testing for railroad em-ployees and test 26,500 of its own workers, Transportation Secretary Elizabeth H. Dole said Wednesday.

Mrs. Dole said that random testing for railroad workers would have to be approved by Congress, but that the Federal Aviation Administration would require such testing for com-mercial pilots and flight crew members through regulatory action. She acknowledged that random testing was likely to be opposed by labor unions and may face a court challenge.

Our primitive ancestors destroyed their environment, too. Page 5.

Creditor Nations Agree on Arrears

By Brian Childs

PARIS -- Western creditor governments agreed Wednesday to re-schedule Brazil's official debt arrears for 1985 and 1986 and the repayments due in the first half of this year, diplomats attending ne-

The accord, signed after three days of negotiations with the so-called Paris Club of creditor nations, was reached despite the absence of an standby agreement between the International Monetary Fund and Brazil, the developing world's biggest debtor.

The sources declined to provide details on the terms of the pact or a figure on the amount of debt that it covers. But they said the section of the agreement covering arrears was close to what Brazil was seeking.

Brazil owes the Paris Club gov-ernments about \$9 billion of its foreign debt of about \$105 billion. It had requested the rescheduling of about \$2.3 billion of arrears on interest and principal for 1985 and 1986, as well as \$3.2 billion in repayments falling due this year.

Brazil was required to agree on terms with the creditor governments before opening talks with commercial bank creditors for a multiyear renegotiation of bank

Bonn Hesitates On Extradition

Concern for Hostage Is Cited; 2d German Missing in Beirut

Washington Post Service

BONN — West German officials ruled out Wednesday the quick extradition of a Lebanese terrenist suspect wanted by the United States, citing the necessity of safe-guarding a West German hostage in Beirnt.

A second West German was reported missing in Lebanon, and officials said that they feared that he had been abducted as well.

The government was preparing for a long crisis following the abduction on Saturday of Rudolf Cordes, 53, an executive of the Hoechst AG chemical company,

officials said "Our principal objective at the moment is to get out Mr. Cordes unharmed," Friedhelm Ost, the chief government spokesman, said. Mr. Ost identified the second missing man as Alfred Schmidt, an employee of Siemens AG, who was installing medical equipment in a West Bearut hospital. There was no immediate official

indication whether Mr. Schmidt's disappearance was connected with the abduction of Mr. Cordes,

An anonymous telephone caller to an international news agency in Beirut said that Mr. Schmidt had been seized in West Beirut, but no group has claimed responsibility.

Officials said that Mr. Cordes was being held by a pro-Iranian Shirte group, Hezbollah, or Party of God, and that the group was demanding the release from West

week at the Frankfurt airport, reportedly while carrying concealed explosives. The United States has formally requested his extradition on charges of nurder and air piracy in the 1985 hijacking of a TWA jet. A U.S. Navy diver was murdered during the 17-day hijacking.

The Justice Ministry said Priday Macaba extratible Mr. Hanna Ser KIDNAP, Dage 2

"It makes sense not to do any-thing with undue speed," said an official who spoke on condition that he not be identified. The danger to Mr. Cordes "would probably be multiplied" if Mr. Hamadei were extradited, he said.

"I don't think that it is a decision that needs to be taken now or tomorrow," an official said, "There have been kidnapping cases that take month and months."

Asked about Washington's de sire to bring Mr. Hamadei to the United States, to face trial, two sources said that the U.S. point of view was "low on the list" of the government's priorities. They pointed to Washington's own se-cret deals with Iran on behalf of U.S. hostages held by pro-Iranian groups in Lebauon.

"The Americans have not been very tough themselves," a source said. "Look at Iran. They should be

In France **Will Face** Hearings

By Julian Nundy

PARIS - A Paris judge has opened the way for legal proceedings against a former Socialist minister whose chief aide is awaiting

trial on embezzlement charges. Former Cooperation Minister Christian Nucci faces possible trial by the High Court of Justice, a court composed of members of the National Assembly and Senate.

It is the only French court competent to try a minister on charges pertaining to his term in office. The court can meet if one-tenth of National Assembly or Senate memhers call it into session. It has met once since the founding of the Fifth Republic in 1959.

Judge Jean-Pierre Michau, the examining magistrate in a case against Yves Challer, Mr. Nucci's former chief of staff, submitted a dossier on Mr. Nucci to the public prosecutor's office late Tues officials said. The case against Mr. Challer involves the disappearance of 20 million francs (more than \$3

The move will oblige parliamen tary committees to decide, in closed ions, whether Mr. Nucci has a case to answer. Court sources said Wednesday that the procedure could not start until Parliament's spring session opens on April 2.

Mr. Chalier is charged with mis-use of funds of Le Carrefour du Développement, or Development Crossroads, a semi-public institution that received money from the Cooperation Ministry.

Judge Michau also ordered the arrest Wednesday of a senior police officer who was charged in December with helping Mr. Chalier obtain a passport under a false name. The passport was issued when Mr. Cha-lier was in hiding in Latin America for seven months last year.

The police officer, Jacques Delebois, the head of the International Service of Technical Police Cooperation, was released later in the

Mr. Delebois said last month that he had asked to be charged in the affair so that he could have access to legal documents in the case to clear his name. There was no official explanation for his brief detention Wednesday.

French media reports have said that Mr. Challer, who returned to France in November, told Judge Michau that he had been advised to flee the country by Charles Pasqua, the interior minister in the conser-March 1986. After Decades of War, Prospects for Peace in Chad

By Jonathan C. Randal Washington Post Service

NDJAMENA, Chad - Now that the roof of the Roman Catholic cathedral, damaged in war, has finally been replaced, there is once again a vague semblance of orderliness here that is reminiscent of that period when the maps of

Africa were mostly blue for British and pink for French. For the first time since shortly after France granted the country independence in 1960, Chadians have a prospect of peace and quiet in what geographers used to call the cross-roads of the Sahara and the gateway to central Africa.

The recent victorious government offensive against the Libyans in northern Chad has encouraged this hope - as well as the possibility, which is still remote - of a total Libyan withdrawal.

But optimism is tempered by the visual reminder of thousands of bullet holes in buildings in Ndjamena from nine months of fighting in 1980 that killed thousands of people, mostly civilians, and destroyed the cathedral roof. By one indicator, Chad is the poorest of the world's nations. Even before two decades of nearly uninterrupted violence, the country accepted its fate as an economic backwater.

Its real importance has been as a gateway to somewhere

For centuries this was true for Moslem nomads who raided animist blacks settled in the south and sold them into slavery in Saudi Arabia and elsewhere.

It was also true during the scramble for Africa a century ago among the British, French and Germans. And it remains the case for Libya's leader, Colonel Moam mar Gadhafi, who seeks to dominate northern Chad. Many moderate African states, as well as France and the

United States, are opposing him, convinced that he has other ambitious south of the Sahara. coise Claustre, a French archaeologist studying ancient cave

But now, for the first time, Libva is without a significant Chadian ally, and Colonel Gadhafi can no longer contend

that the fighting is purely among Chadians.
In October, Goukouni Oueddei, a former president overthrown in 1982 by a fellow northerner, Hissène Habré, broke with Colonel Gadhafi while under virtual house arrest in Tripoli. His 1,500 Toubon nomad troops in the rugged Tibesti mountains of northwest Chad joined Mr. Habre's sovernment forces.

The Libyan connection started with Chad's first president François Tombalbaye, who was a southerner. He touched off a rebellion in the mid-1960s by sending overbearing southern officials to the north, which is ethnically distinct. In 1973, Tombalbaye turned to Colonel Gadhafi for money and purportedly acquiesced in Libya's annexation of

runs along the frontier. Northern Chadians thus would be deprived of their prime natural resources. With rebellion spreading, even the voodoo priests Tom-balbaye imported from Haiti as part of an African "authenticity" campaign failed to prevent his assassination in a 1975

the Aozou Strip, which is said to be rich in minerals, which

paintings in the Tibesti. executed when Paris refused to meet Mr. Habre's conditions. Nonetheless, the northerners received an undisclosed

amount of money, vehicles, medicine and other supplies.
The two northern leaders fell out in 1976 over the issue of Libya's annexation of the Aozou Strip. For tactical reasons, Mr. Gonkouni remained loyal to Libya. Mr. Habré broke with Colonel Gadhafi and soon became the focus of interest and aid from the United States, France, Egypt, Saudi Arabia and Sudan, which were determined to block Libyan expan-

Although he was repeatedly defeated and counted out, Mr. Habré used these foreign friends to fight his way back to

He is driven by a desire to retake Faya-Largeau, his northern hometown casis, although it is not a major issue to

The dominant concerns of most Chadians relate to some uneaviable distinctions the country holds, starting with the world's lowest annual per-capita income: 578, according to statistics from international organizations.

Moreover, Chad has no railroad, no river port, no daily departing international airline flight and no daily newspa-per. Its 155 miles (250 kilometers) of paved road are in deplorable condition.

■ Libyan Outpost Captured

WORLD BRIEFS

China Imposes Strict New Press Curbs

BEIJING (LAT) - China imposed strict new curbs on the press Wednesday, creating a high-level organization to control all aspects of news and publishing operations throughout the nation.

The action apparently is aimed at reining in those Chinese newspapers and magazines that are not directly affiliated with the Communist Party

and that have been showing some signs of independence in recent years. The Xinhua news agency said the organization, called the Media and Publications Office, was being set up directly under the State Council, the Chinese equivalent of a presidential cabinet.

The office will have responsibility for approving all new newspapers, magazines and publishing houses in China. It also will control the sale of books, magazines and newspapers, supervise distribution of paper and newsprint and "oversee the publication of news."

Soviet Jamming of BBC Misses a Beat

LONDON (UPI) - The Soviet Union did not jam BBC Russianlanguage radio programs Wednesday, the first time in more than six years. A Foreign Office source said it was too soon to tell whether the change was an "important" policy shift.

"We don't know why they stopped nor if it is linked to anything at this point," the source said. The end to the jamming could merely be a technical fault with the Soviet equipment, the source said. But "if it is deliberate it could be very important as it would seem to indicate a change in policy," he added.

However, John Tusa, managing director of British Broadcasting Corp. external broadcasting, said he welcomed "this small demonstration" by

the Soviet Union.

Seoul Vows Police Will Respect Rights SEOUL (Reuters) - The new interior minister, Chang Ho Yong, pledged Wednesday that the South Korean police would respect human

There should never be further cases of torture or human rights abuses in our society," said Mr. Chung. He replaced Kim Ching Hoh as interior minister Tuesday after it was disclosed Monday that Park Jong Chol, 21; a student, was tortured to death while in police custody last week.

President Chun Doo Hwan ordered his cabinet to set up a special body wide elections in November, a lack of security was identified as Rio de to "prevent the repetition of this torture incident and protect the people human rights," a presidential spokesman said. "The body should be composed of leaders from various social sectors and study measures to while 60 percent of those ques-tioned in São Panlo favored the protect human rights," he quoted the president as saying.

Mixed-Race Leader Apologizes to Botha CAPE TOWN (AP) - The leader of the mixed-race House of Representatives apologized to President Pieter W. Botha on Wednesday for causing him embarrassment by swimming at a whites-only beach. The apology thus averted a crisis that could have brought about the dissolu-

The letter of apology was released to the press at a news conference by Mr. Botha. He said he had told the Labor Party leader, the Reverend Allan Hendrickse, that he must apologize or be dismissed as a cabinet member and head of the council of ministers in the House, "I appointed

him," the president noted Mr. Boths said that dismissing Mr. Hendrickse would have forced him to dissolve Parliament. That decision apparently would require new elections for all three houses of Parliament, rather than for just the white chamber, as is planned for sometime this year. In 1984, Parliament created chambers for whites, Asians and people of mixed-race, but there is no national representation for blacks.

Contadora Mission Reports No Gains

MEXICO CITY (Reuters) — A high-level Latin American diplomente mission has completed a two-day tour of Central America but has given no hint that any progress was made in efforts in bringing the nations of the region together in peace talks.

Speaking for the Coutadora Group mission after its arrival here Tuesday night, Foreign Minister Bernardo Sepúlveda Amor of Mexico said the group was now seeking "common denominators" in the positions of the Central American nations.

He said the leaders of the five countries visited — Costa Rica

He said the leaders of the five countries visited - Costs Rica. Nicarague, Gustemale, Honduras and El Salvador - had all expressed "grave preoccupations" over increasing tensions in the region. But he said the major differences that had so far prevented a peace dialogue still

The delegates included the UN secretary-general, Javier Pérez de Cuellar, the head of the Organization of American States, Joso Baena Sources; the foreign ministers of the four nations comprising the Conta-dora Group, and their counterparts from the four-nation Latin American "support group."

For the Record

Western diplomats in Beijing predicted Wednesday that the upcoming round of border talks between China and the Soviet Union, which are due to resume Feb. 9 in Moscow after eight years, would be long and difficult, given the gap between the two nations' positions.

By Julian Nundy

al Herald Trib PARIS — A high-ranking Iranian envoy visited France this week for talks with French officials amid reports of a new chill between Paris

The visit, by a Foreign Ministry official, came as a French magazine said that the government had received a warning that a terrorist bombing wave that hit Paris in Sep-tember, killing 11 persons, could resume shortly.

The attacks, according to the conservative Le Point, would begin again if Georges Ibrahim Abdallah, a Lebanese jailed in France on arms charges, is not tried by the beginning of March on other charges that he faces.

He is due to be tried in connec-

tion with the murders of an Ameri-can and of an Israeli diplomat in 1982. Court officials said Tuesday that a decision on the date for the trial would be announced Jan. 28. The Iranian envoy, Ali Ahani, the head of the Foreign Ministry's European and American Department, met with Foreign Minister

Jean-Bernard Raimond for nearly two hours Monday for talks that were believed to concern French hostages held by pro-Iranian groups in Lebanon. Officials gave no details of the meeting.

Just before leaving Wednesday, he met with Prime Minister Jacques Chirac briefly to transmit a

cials and diplomats believe. They ment that would include some Afsee Soviet officials requiring at ghan figures who have served in least a face-saving political solu-tion to accompany their pullout a "decent interval," officials have anything," a Pakistani diplomat called it - during which a regime

friendly to Moscow could preside.

Soviet troops were sent into Af-hanistan in December 1979 to help crush an insurgency by Islamic tribesmen. Given the long border between the two countries and the grueling war that has cost an esti-mated 25,000 Soviet lives, Moscow is expected to make any pullout tingent on the creation of an Afghan government that is not dominated by the West or by other elements hostile to the Soviet

The United States has already agreed to be a guarantor of the UN-sponsored agreements when and if they are completed, a commitment that implies ending the flow of American weapons to the insurgents. Pakistan and Afghani-

ment is left behind in Kabul, offi- din, to accept a coalition governpro-Soviet regimes.

"We can't force them to accept

A State Department official said: "Our position is that it's up to the mujahidin to determine what a future regime would be like. We're not looking for a puppet state for the West, but we won't accept a puppet state for the East. The U.S. leaving it to the mujahidin." On Saturday, the mujahidin end-

ed a three-day conference in Paki-stan with a toughly worded declaration that a government composed of the seven insurgent factions based in Peshawar, Pakistan would take over after a Soviet withdrawal, a Pakistani diplomat noted. Any Afghan who serves in a government under Soviet dominstion would be considered as a Sovi-

et agent, he said. Diplomats speculated that the

ghan insurgents could be a negotiating position masking some flexibility, but they said they were not

SUITE One complication is that the UN negotiations, in which Pakistan and Afghanistan do not talk directly but through UN officials, do not deal with internal Afghan political affairs. If they are to be resolved. they must be negotiated informally by Pakistan, the United States, Afghanistan, the Soviet Union and

the insurgents. ■ Armacost Stresses Caution

While Mr. Armacost's visit was portrayed officially as a routine opportunity to exchange views, he is believed to have pressed Pakistani officials not to rush to a decision that Moscow has markedly changed its policy toward Afghani-stan before full details of the Soviet position are known. The Washing-ton Post reported from Islamabad.

Mr. Armacost underscored this Islamabad on Tuesday that while the Soviet initiatives were discussed, "it is deeds that count, and the deed that is most important is the withdrawal of Soviet troops from Afghanistan."

He indicated that there is no change in the U.S. position on Aighanistan so far, saying that Washington has "always supported the just struggle of the Afghan people to see that foreign troops leave their country and see that political arrangements are established in Kabul which are responsive to the

U.S. Rights Aide Resigns in Protest

By Kenneth B. Noble New York Times Service

WASHINGTON -The government official responsible for requiring U.S. contractors to hire minority workers has resigned in protest, saying some Reagan ad-ministration officials are paying only "lip service" to enforcement of anti-discrimination laws.

In one of the most pointed attacks from an administration insider, Joseph N. Cooper, who has been director of the Labor Department's Office of Federal Contract Compliance, said Wednesday that some administration officials believed "that affirmative action has done too much, gone too far, become too

Head of the contract compliance program for 17 months, he resigned without explanation Friday.

He identified Attorney General Edwin Meese 3d and Assistant Attorney General William Bradford Reynolds as among those who sought to thwart federal rules that require numerical biring goals for companies that do business with the government. The rules affect more than 20,000 companies employing 23 million workers at 70,000 sites.

David F. Demarest, a Labor Department spokesman, said there would be no comment from any officials within the agency. Terry H. Eastland, a Justice De-

partment spokesman, said of Mr. Cooper's remarks: "The problem is not at all with affirmative action, Mr. Cooper, who is black, said which this attorney general and his these "vocal dissenters promote the predecessor and Brad Reynolds

quotas, and that reverse discrimiis whether you're going to have new report "proves what I said earnation is a reality," adding, "They racial preferences, and we cannot lier, that there are three problems support that. If Mr. Cooper is going to say that the only kind of affirmative action must be racially preferential, in terms of hiring and promotion, then we must strongly disagree with him." President Ronald Reagan is con-

sidering a recommendation from the Justice Department to elimipand the pool of minority members message on Tuesday an invitation and women considered for hiring to Congress to join him in a budget and promotion, but without any numerical standards.

Under the rules, contractors hire and promote workers who are black, Hispanic or women in rough proportion to the numbers of avail-able qualified candidates.

Ecuador to Disband Military Unit That Held Chief

OUITO, Ecuador - President León Febres Cordero said the military high command plans to dis-band the paratrooper unit whose members held him hostage for 11 hours, but denied the action violated his pledge to take no reprisals lier, that there are three problems against the rebels.

Amid warnings from Ecuadoran and U.S. officials that the situation in the country remained serious, the National Congress, meanwhile, began voting Tuesday on a motion urging Mr. Febres Cordero to resign. Congress is controlled by the

After a debate that could last several days, the single-house Congress is expected to approve the resolution. Impeachment proceedings are also a possibility, but are considered unlikely because the opposition lacks the necessary twothirds majority to remove the president from office.

Australia and Sweden Plan Network to Monitor N-Tests

By Michael Richardson

International Herald Tribune
SINGAPORE — An international network of seismic stations to monitor underground nuclear tests is likely to be operational within three years even if the Unit-ed States and the Soviet Union refuse to participate, Australian offi-cials said Wednesday.

They said the network might be formed by Sweden and Australia next year.

Using sensitive detection devices and advanced computer and com-munication facilities, a Swedish-Australian link would be capable of detecting all but the smallest nuclear explosions in most parts of the world, the officials added.

The governments of both countries, which are leading advocates of nuclear arms-control measures, say they believe that a global seismic surveillance system would make a major contribution to the conclusion of verifiable treaties banning or strictly limiting tests of

testing.

The resolution was co-sponsored by 26 countries, including Sweden, Canada and Japan. The United States and Britain, both of which opposed the resolution in 1985, abined. Only France voted against

The Reagan administration contends that some testing of nuclear weapons would be needed as long as the United States and its allies

Weather Shift Is Moderate As El Niño Comes Back

By Boyce Rensberger

Washington Past Service
WASHINGTON -- El Niño, the occasional climatic disturbance that shifts the world's weather pat-terns and can cause severe weather

problems, has returned. The National Oceanic and Atmospheric Administration, in an advisory Tuesday, said the current El Niño is near the midpoint of a typical 18-month life cycle. But. nlike its disastrous predecessor in 1982 and 1983, it appears to be moderate and is not expected to cause severe problems anywhere.

the agency said. El Niño has brought drier than usual weather, although not drought, to the western Pacific region of the Philippines, Indonesia. Australia and New Guinea.

The zone of altered weather is expanding eastward and could bring dry weather to Brazil next month when the rainy season usually begins, the agency said. Southem Africa is also drier.

The last El Niño, which began in large clouds that keep the region April 1982 and ended in July 1983, wet. was the worst in more than a century. It was blamed for 1,300 to 1,500 deaths worldwide and economic osses of \$2 billion to \$8 billion. It brought Australia its worst drought in two centuries and Peru its most rain in 450 years.

They add that it would go a long depend on such weapons as a deterway toward preventing cheating, rent against attack.

The Australian officials, contacted by telephone in Canberra, made ing the planued resumption of talks Geneva on Thursday between the United States and the Soviet Union on ways to limit nuclear

Australia, a U.S. ally, wants carly agreement on a total test ban treaty. A resolution sponsored by Anstralia and New Zealand calling for this step received overwhelming support in November at the United

> Although the first sign is often the warming of surface waters in the eastern tropical Pacific, this is the result of a shift in prevailing wind patterns whose cause is un-

> Usually, equatorial Pacific winds blow from east to west, pushing the warmer surface waters westward and causing the warmer water to pile up to a greater depth toward the west. As a result, the air above the western warm zone develops

> If the winds die down for a long enough period, as they do every two to seven years for unknown reasons, the warm water shifts back toward the east, carrying the rainy zone eastward and disrupting

rent against attack

The Soviet Union declared in August 1985 that it would observe their comments in the days preced- a self-imposed ban on nuclear testing. But Mikhail S. Gorbachev, the Soviet leader, said recently that the moratorium would end as soon as the United States carries out its first test in 1987. Washington has announced that it is planning a test for Feb. 5.

> President Ronald Reagan, under pressure from Congress for proress on arms control, asked the Senate last week to approve two treaties limiting testing provided Moscow dropped its long-standing opposition to on-site inspection.

Mr. Reagan told lawmakers that the 1974 Threshold Test Ban Trea-ty and the 1976 Peaceful Nuclear plosions Treaty were "not effectively verifiable in their present

The treaties, which have a common purpose of limiting individual nuclear explosions to no more than 150 kilotons, were signed but not ratified by the United States and the Soviet Union.

A kiloton is a unit of measure of a nuclear weapon's yield, equiva-lent to the explosive energy of 1,000 tons of TNT. The yield of the atomic bomb dropped on the Japanese city of Hiroshima in August 1945 was 12 to 15 kilotons.

In September, the Australian government inaugurated a seismo-logical center in Canberra that is capable of detecting underground nuclear explosions larger than five kilotons as far as 6,250 miles (10,000 kilometers) from the center of Australia.

Scientists say Chinese, French, Indian and the main Soviet nuclear test sites can be monitored from Australia, Soviet and U.S. test sites could be covered from Sweden.

They say the stable and ancient rocks that form the land areas of Australia and Sweden provide exremely quiet locations where seismographs can be operated at higher magnifications than those obtainable on most other parts of the globe.

Officials in Canberrs said Australia would establish an international seismic data center next year - one of four in the world. The other three are in Sweden, the United States and the Soviet Union.

One senior official said that there were still technical problems to be ironed out and that a cheathave to include on-site verification as well as seismic monitoring.

In Africa, New Openness On AIDS, but With Limit

By James Brooke New York Times Service BANGUL, Central African Reblic - One week, the health au-

thorities here completed a pioneer-ing comic book designed to warn Central Africans in simple lan-guage about the danger of AIDS. The next week, officials de-stroyed videotapes made by a French television crew about vic-tims of the disease in Bangui Hos-

In this capital, where 4 percent of all adults are believed to be infected with the AIDS virus, the seemingly contradictory actions by the local authorities in December reflected attitudes common in much of Africa toward acquired immune leficiency syndrome

When talking to their own citizens, African governments increas-ingly treat AIDS like any other ic health problem. When talking to the outside world, African overnments appear to seek to hide

In Zaire, a pro-government newspaper, Elima, recently pub-lished a series of six articles describing AIDS and giving advice on how to avoid getting it.

"Zaire has opted for an objective information campaign, serene and but not whether a person will de-humane," wrote Kitoto Kalombo, velop the fatal disease. the information director of Zaire's Public Health Department. But, he added, Zaire "continues to refuse to allow its fellow citizens who are victims of AIDS to become the object of cynical and unhealthy ex-ploitation by the Western press."

Joune Afrique, the leading news weekly of French-speaking Africa, made AIDS the leading article of its year-end issue. The author said those responsi-

ble for ignorance in Africa about the disease were "doctors anxious

misplaced" sense of responsibility and governments "that have practiced an ostrich policy."

But many Africans say they be-

lieve that international discussion of AIDS in Africa puts the conti-nent in an unfavorable light. In November, several Nigerian

newspapers published an article distributed by the Soviet press-fea-ture syndicate Novosti on the origin of AIDS. It implied that the virus had escaped after "secret experiments at a laboratory develop-ing biological weapons at Fort De-trick, Maryland."

The true origin of the virus is not fore the verdict that if Mr. Foerster known. According to an article in were acquitted he tright appeal the U.S. magazine Science in No-After the verdict was announced, Zaire, in 1959.

In Bangui in December, Health Ministry officials declined to talk shout AIDS with an American reporter, but the problem was openly scussed among residents.

The French Army administers AIDS antibody tests to "African hostesses" who work in the army's two field brothels, one in Bangui and another in Bouar, about 200 miles (325 kilometers) northwest of Bangui. The tests indicate infection velop the fatal dis

So far, according to Colonel Jean Carrié of the French Army, no French soldier garrisoned in the nation has died of AIDS. But it is estimated that 800 Cen-

trai Africans died of the disease in In 1985, a random sample of 327 people in Bangui from age 15 to 34 found that 4 percent had antihod-

ies to the AIDS virus in their blood. "AIDS is a very serious problem in Central Africa," seid Alain Jean Georges, the research director at the Pasteur Institute in Bangui. He said his laboratory performed 100 blood tests for AIDS antibodies a

EMPLOYMENT

Drug Trial

PENANG, Malaysia - The Penang High Court acquitted a West German on Wednesday of drug trafficking charges that are punishable by death.

The case of the defense became so overwhelming and convincing that I have to acquit and discharge him." Justice Edgar Joseph said in

Hanging is mandatory in Malaysia for anyone convicted of possessing 200 grams (7 ounces) or more of cannabis resin. The defendant, Frank Foerster, 24, had been charged with trafficking in 239.7 grams (8 ounces).
"I'm fine and well," Mr. Foerster

said after his acquittal was an-

Justice Joseph said that one reason for acquitting the defendant was that there had been conflicting evidence about where the drugs had been found. Mr. Foerster was arrested in his botel room on the resort island of Penang in Novem-

Because Mr. Foerster had not tried to dispose of the drugs when the police knocked on his hotel room door, the justice said, it indidrugs were among his possessions.

The accused," the justice add-

ed, "stood up well on cross-examination and he was not shaken." The deputy public prosecutor. Mohammed Bazain Idris, said be-

vember, the earliest known AIDS Mr. Bazain left the court without virus was identified in Kinshasa, commenting Two West Germans traveling with Mr. Foerster when he was ar-

rested were held briefly. They left the country and refused to return to testify, but they said in sworn statements that the druss

were theirs. Justice Joseph accepted the affidavits, saying that their contents exposed both men to criminal prosecution and that under normal circumstances people would not take

Justice Joseph earlier had disssed two alleged confessions by Mr. Foerster on the ground that he was not cautioned before making one of them and had been induced

to make the other. Mr. Foerster testified that police had told him he would be deported if he confessed that the drugs were his. He also testified that he had agreed not to implicate his friends.

Statistics from the police narcotdivision show that 41 people -Malaysians, 6 Singaporeans, 2 Australians and 1 Indonesian have been hanged for drug trafficking since 1983.

Jakarta's Population Rising United Press International

JAKARTA — This city's p reach almost 13 million by 2000, making it the world's sixth most populated city after Mexico City, São Panio, Bombay, New Delhi and Cairo, said the Indonesian pends an average of \$1.67 a year population and environment minister, Emil Salim, on Tuesday.

The findings may finally put an end to what Dr. Jared M. Diamond describes as "the environmentalist myth" — an alleged bias of many scientists toward "the romanticized concept of the 'noble savage' " proclaimed by the 18th-century philosopher Jean-Jacques Rousseau. Writing in the British journal Nature, Dr. Diamond, a professor of physiology at the University of California (Los Angeles) School of Medicine, cited the destruction of plant species on Easter Island and in the Chaco Canyon in northwestern New Mexico as glaring examples of primitive human abuse of the land.

"The reason for this bias," he said in an interview, "is that primitive peoples have been so horribly treated by whites over the centuries that many whites today justly feel a radioactive carbon 14. sense of guilt. Scientists, among others, sometimes tend to compensate for this in inappropriate ways. For example, it has become politically and socially inexpedient to write or speak of the role of the Maori aboriginals of New Zealand in the extinction of the moa" - a large flightless bird - "or of early Polynesian settlers who brought about the extinction of various Hawanian birds."

Dr. Diamond and like-minded archaeologists believe that some societies contributed to their own demise by abusing the lands on which they lived. At the same time, a declining society is likely to aban-don conservation, he said, making the spiral of decay tighter.

Strong support for Dr. Diamond's revisionist point of view has come from Julio L. Betancourt, an archaeologist, and his colleagues at the University of Arizona, who bave extensively studied the Anasazi Indian civilization that flour-ished in New Mexico's Chaco Canyon from about 1000 to 1200.

The Chaco Canyon has long fas-cinated and mystified archaeologists. Its vanished inhabitants, be-lieved to have been ancestors of modern-day Hopi and other Pueblo Indian groups, built the largest and tallest buildings that existed in North America prior to the advent

RECENT discoveries in the southwestern United States, adobe apartment buildings that stood as high as five stories and whose ruins are still impressive.

whose ruins are still impressive. Relics of this culture form an exhibition scheduled to open on March 6 at New York's Museum of Natural History.

Although archaeologists consider the Chaco Canyon culture to have been almost as advanced as that of the Maya in Central America, the Chaco Canyon inhabitants were unable to sustain the life-giving qualities of their environment.

"Throughout the Anasazi region," Mr. Betancourt said in an interview, "pack rats established nests and left middens" or dungheaps. "The feces and scraps they left in the middens were soaked in urine, which dried and crystallized, preserving the seeds and plant fragments the rats had eaten.

The rats always foraged within a 50-yard radius of their nests, he explained, and as many as 30 different plant species are represented by fossilized seeds and twigs in each midden. The age of the mate-rial is determined by analysis for

"This gives us a series of snapshots of what plant species were growing in the Chaco Canyon region at various times during the history of the region," Mr. Betan-

"You can see abrupt deforesta tion in the Chaco Canyon, as stark-as night and day, as obvious as it is on Paster Island in the Pacific, Prior to 1,000 years ago there was pinyon-juniper woodland in the Chaco Canyon, and for the past 1,000 years it was gone. The change

Although the cause of the deforestation is debated by scientists. Betancourt believes the evidence supports the view that as the Chaco Canyon builders used up local woodlands for fuel and building. erosion destroyed the top soil and deepened the surface water channels that had been important for irrigation, converting them into ag-riculturally useless arroyos.

"This accounts for the fact that the geological record shows us a major deepening of water channels in the area between the 12th and mains so today.

15th centuries," Mr. Betancourt

Another form said. "It's perfectly evident to me that people beat the hell out of the environment there, and then they

habitat is to be preserved. Dr. Diamond notes that deforestation also occurred on Easter Island in the South Pacific. Instead of moving on, however, the Easter Islanders abandoned their early artistic culture and land conservation practices to become warriors and cannibals. The island was once lushly covered with palms and other trees, but when its Polynesian population burned the wood and began allowing livestock to graze throughout the island, irreversible erosion destroyed the topsoil. By the beginning of the 18th century, Easter Island was barren, and re-

he said, if the fragile Southwestern

Another form of support for Dr. Diamond's thesis is emerging in a series of papers published by a team of Stanford University archaeologists who recently completed a three-year expedition to the

Abused and Destroyed Their Environment

quite well from the amount of soil that erodes from high slopes and washes down as silt in the valleys."

المكذا من الأمل

Most of the region's original topsoil was stripped away by the rav-ages of the last Ice Age, Dr. Runnels said, but when the human at the beginning of the Bronze Age," he said, "the population of the Southern Argolid increased dramatically, land was cleared as agriculture became intensive, and there was a period of severe erosion. We see it clearly in the great volume of silt that was washed down into the valleys and bays at

But ancient civilizations eventually learned to build terraces to prevent erosion. From the height of the great Mycensean civilization in about 1,600 B.C. until its end in 1000 B.C., we find no erosion at all. The Mycenseans were great builders, of course, and they probably put up some of the original terraces and check dams that have been rebuilt over the ages and are still

But the great disadvantage of terracing, Dr. Runnels said, is that terraces must be constantly repaired and kept from leaking. If livestock are allowed to trample and damage a terrace, rain water dragging down the dammed-up topsoil and initiating runaway ero-

sion that may be irreversible.

when he let things go to pot. One practices were reinstituted only ar-can gauge the health of a society ter the Classical Greek period began about five centuries before Christ. With the decline of Greek political power between the third century B.C. and about 50 B.C., another period of severe erosion is detectable in silt patterns, Dr. Runnels said. A revival of sound agripopulation began to grow rapidly, cultural practice occurred during they soon made their mark on what the Roman era, but erosion set in was left. "Roughly 5,000 years ago, again in the sixth century A.D. Two more social crises in the Southern Argolid are discernable: in silt patterns of the medieval period and of

> The current silting may be related, he said, to increased grazing on upland slopes, neglect of terrace repairs, the cultivation of such high-value crops as lemons (which consume large amounts of water), and the growth of the tourist industry at the expense of soil conserva-

"Right now, the people of the area are pushing for fast profits. But even a slight downturn in world conditions, or a decrease in the buying population of Athens, or a war interrupting shipping in the Eastern Mediterranean - any of those things could wreck agricul-ture in the Southern Argolid. The terraces would go to pot and what little topsoil is left would slide into the sea."

The tendencies of mankind have and damage a terrace, rain water changed little over the centuries, soon cuts a channel through it. Dr. Diamond believes. "By nature, present-day man is neither more nor less destructive of the land than was his forebears," he said. "It's The silting record shows that se- just that the technology of destrucvere erosion occurred after the col- tion is vastly more efficient than it lapse of the Mycenaean civiliza- was in the past. There never was tion, and that conservation such a thing as a noble savage."

IN BRIEF

Scientists Ponder Time

CHICAGO (NYT) - Of all phenomena that affect the human condition none has perplexed scientists more than the forward march of time, its link to the seemingly relentless tendency toward disorder known as entropy, and to the expansion of the universe.

Some of the world's leading theorists have speculated that, if the current expansion reverses itself and the universe begins to contract, the arrow of time will change direction. People - if there are any - would live from the grave to the cradle and would "remember" what is to happen tomorrow. Some theorists have suggested that those living in such a universe would not be aware that time was running backward, because their perception of time would be reversed. But they would live in a universe whose future, in every detail, is predetermined. Scientists have also suggested that our universe might have a twin, formed of antimatter, in which time runs backward.

Stephen W. Hawking of Cambridge University in England, a prominent proponent of the view that time would run backward in a shrinking universe, announced recently that he had changed his mind. Recent research had led him to conclude that time would still march forward, even if the universe began to contract, he told a conference in Chicago on

Placebo's Chemical Effect

WASHINGTON (WP) — A placebo given for pain may be as effective as 8 milligrams of morphine, a modest dose, medical researchers have found.

A placebo is any pill, potion or procedure that has no direct effect but which the patient believes is going to prove effective in treating some illness. Placebo drugs are often merely sugar pills. A mother's kiss on a skinned knee can also act as a placebo.

Now Dr. Jon Levine of the University of California at San Francisco has found that placebo pain relief is also chemical. He has found evidence that it is the result of the brain, triggered by expectations, produc-ing quantities of natural pain-killing substances that are chemically similar to opiates such as morphine. Such natural pain-killers have been the subject of

Super Carrot Developed

WASHINGTON (WP) - Plant breeders have produced a "super carrot," a new variety of the vegetable that contains 10 times the usual amount of carotene, the substance that the body converts into vitamin A.

The development could prove a boon to parts of the Third World where vitamin A deficiency is so severe that millions of children suffer permanent blindness as

The new carrot, called Beta III, was developed at the Agricultural Research Service's Vegetable Crops Research laboratory in Madison, Wisconsin. Field tests are under way in south Asia and central Africa to further adapt Beta III to local soil conditions. There is inhibit development of cancer.

Dyslexia's Cause Studied

NEW YORK (NYT) - Many factors have been offered to explain the reading disorder dyslexia, among them impaired vision, head injuries, and innerear disorders. Now researchers studying the brains of dyslexics have discovered a pattern of cellular and structural abnormalities that suggest the reading disorder is caused by abnormal prenatal development of

As a result, doctors may soon be able to identify children with these abnormalities and recommend special tutoring or treatment to prevent failure in

While the severity and symptoms of dyslexia vary. its victims generally have problems perceiving shapes of words. Letters appear to bob and weave on the page, sometimes dancing off the edge, other times transposing themselves. Dyslexia is unrelated to intelligence. Thomas Edison, Albert Einstein, Winston Churchill and Woodrow Wilson are all believed to have been dyslexic,

10 Galaxies Discovered

PASADENA, California (AP) — Scientists have discovered 10 galaxies in a hidden zone of the universe behind the Milky Way, and say tens of thousands more could be revealed by a full-scale search.

The star systems were found when astronomers

used a radio telescope to peer into the "zone of avoidance," the quarter of the sky hidden from optical telescopes by dust, gas and billions of stars surrounding Earth in the flattened spiral of our own galaxy, the Milky Way. While 10 is a small number of galaxies in a universe believed to contain billions, the discoveries are significant because they were made during a pilot attempt to explore the zone of avoidance, said Steve Maran, spokesman for the American Astronomical Society and a senior scientist at the National Aeronautics and Space Administration's Goddard Space Flight Center in Maryland.

Alzheimer's Clue in Dogs

NEW YORK (AP) - Brains from aged dogs, monkeys and a polar bear show hump-like plaques similar to those found in Alzbeimer's victims, suggesting that clues to the disease may be found in animal experi-

ments, a researcher says.

Although the animals did not have Alzheimer's, further studies might lead to an animal version of at least part of the disease, said Dr. Demial. Scientists have a control when the disease of Harvard's Brigham and Women's Hospital. Scientists have not yet found an animal version of Alzheimer's. which would allow more experimentation than is now

Dr. Selkoe's research focused on amyloid, a fibrous material that makes up the plaques found in brains of Alzheimer's victims. Such plaques also appear in normal aging, but Alzheimer's victims accumulate them

To the Paradise of Kilanea Sets Lava Record Washington Post Service WASHINGTON - One of the world's most active volcanoes, Kilauca in Hawaii, has poured out 850,000,000 cubic yards (650,000,000 cubic meters) of lava

RUE DU PARADIS (Paris 10°) since its current eruption began in January 1983, a record for Kilanea, said the U.S. Geological Survey director, Dallas L. Peck. That is enough lava to cover the District of Columbia to a depth of 12 feet (3.6

Ease the Export Controls

military weapons and sometimes civilian goods with military uses. The buyers are often Russian. But for years there has been a rancorous quarrel in the Reagan administration over the breadth of these controls. The Defense Department has pressed incessantly to keep adding items to the list, often goods openly available abroad. Almost everyone else in the administration has been arguing that the controls are already too broad to be effective. But the Defense De-

partment has usually had the upper hand. As the complaints continued to rise, the tion eventually set up a com sion to look into the controls. It was headed by Lew Allen Jr., a former chief of staff of the air force, and included a former secretary of defense, Melvin Laird, as well as a former deputy director of the CIA and a former director of defense research and engineering. Their report, which appeared this week, offers sensible and useful advice.

The Soviets make strennous and frequently successful efforts to acquire Western technology by hook or by crook. But they lag behind the West in most fields and, the commission found, the gap may be widening because of Soviet dependence on Western equipment which, by the time it comes onto the commercial market, is always behind the work going on in the labs. The commission urged the administra-tion to give more weight to economic con-

Everybody agrees that the U.S. government has to control sensitive exports — used to increase ment has to control sensitive exports. — U.S. exports, particularly of the high-technique nology industries that are America's special strength. The commission found that by 1985, fully 40 percent of U.S. manufactured exports, not counting military goods, were covered by export controls. The sheer volhes the attention to the few truly critical items. Meanwhile, the commission says, American companies are los-ing sales because of licensing delays. It takes on average six weeks to get an export license from the Commerce Department; a Japanese exporter can get one from the Tokyo government in two or three days.

The commission described the case of a U.S. exporter trying to sell something called a nuclear magnetic resonance spectrometer to a medical institute in Eastern Europe. The licensing procedure took nearly three years because of the device's microprocesyears because of the device's microproces-sors and disk drives — components, the report noted, produced by the millions in other countries. "Although U.S. firms pio-neered the development of NMR techno-logy," it said, "German and Japanese com-panies now hold two-thirds of the world

market for instruments incorporating it."
The West's technological advantage is best preserved not by secrecy but by mainng a high rate of innovation. The present swollen and cumbersome system of export controls is doing more damage to American security than to the Soviets.

Help for the Wrong Side

tively to constrain Iranian oil exports. Both countries have missiles with which they can attack each other's cities. But in this war neither long-range bombing nor attacks on civilian populations are crucial. What really counts is the war on the ground and the ability of troops to take and hold territory. The current fighting has resulted in no crucial victory so far, but it is clear that the Iranian infantry — at a terrible cost in lives, but one that its leaders are willing to pay is grinding forward. The Iraqis, much more heavily armed but outnumbered and less

aggressive, are on the defensive.

For the first time it begins to seem possible that Besra could fall. That would be a devastating possibly fatal setback to Iraq. There would be three kinds of consequences: It would give tremendous momentum to Islamic fundamentalism, a religious movement that is, in political terms, militantly anti-Western; it would increase the threat both to larael and to the conservative

Iraq has had air superiority throughout Arab states on the west side of the Gulf, its long war with Iran and is using it effection notably Saudi Arabia; it would greatly strengthen Iran's influence over oil prices.

The revelations of U.S. arms sales to Iran have given a very significant lift to Iran's morale and strengthened the impression in the Middle East that an Iranian victory is becoming inevitable. One of the strangest aspects of President Reagan's decisions to proceed with the sales is that neither be nor the people around him seem to have given sufficient consideration to those consequences or to the harm to U.S. interests that would flow from an Iranian triumph.

The battle for Basra continues, Iranian artillery has apparently come within range of an oil refinery and started a spectacular fire. The number of deaths in the fighting is rising rapidly. Iran presses forward; the rest of the world wants desperately to bring the war to a stop. None of the world's powers has found a way to do it, and one of them, the United States, has given inadvertent but

substantial support to the wrong side. — THE WASHINGTON POST.

The Great January Rally

The dollar plummets, America's trade ther do Houston office buildings bessing accounts are a mess and every day the for tenants or Treasury bonds paying annational debt grows by half a billion dolmic interest rates. And with tens of billions lars. But sobering news from Washington of dollars in pension and mutual fund cash and Tokyo seems to have little impact on flooding Wall Street each month, money investors' enthusiasm. The Great January Rally has lifted the Dow Jones Industrial Average by II percent, increasing the value of all traded stocks by an astounding \$270 billion. Does Wall Street know something

that the rest of us don't? There are several explanations for the

boom, none entirely satisfying:
The overdue adjustment. The American economy has been growing for five years without inflation, and in spite of well publicized bad trade news American business has never been leaner or more productive. Today's seemingly lofty stock prices are, on average, just 14 times corporate profits. That is a third lower than at the peak of preinflation optimism in 1968.

The cheap buck. The collapsing dollar has made a turbo-charged Mazda or a night at the Ritz depressingly expensive. But bad news for American tourists and consumers should be good news for American industry, which will eventually reap a windfall from extra sales at home and abroad. The is not yet possible to pinpoint ways in which low-priced dollar also makes American this new trading environment has damaged stocks temptingly cheap for investors with

shares may not seem like great bargains to thinking about turning them yellow. the typical institutional investor, but nei-

managers have to put it somewhere.

The greater fool theory. For Wall Street ers easer to justify six-figure salaries, what might happen in 10 years is not nearly as interesting as what might happen in 10 days. Stocks can never be overpriced as long as there is a "greater fool" who will pay even more next week.

Whether any such explanations are right is hard to know. But there is comfort in the knowledge that historically there is not much connection between stock market averages and real gains and losses from jobs. profits and inflation. The January rally will not change the facts of economic life much: neither would a February bust.

What is troubling about the current speculative fever is the speed of the temperature change. Factors like low-cost automated trading, the rise of institutional investors and the worldwide imbalance in savings rates all have accelerated the pace at which markets adjust to changing expectations. It marks and yen to spend.

The liquidity boom. Exxon and Ford

turning governmental lights red. But, given
all that speed, it is surely time to start turning governmental lights red. But, given

Africa Needs Much More Aid

ement of his first trip to Africa as secretary of state, George Shultz. held an undersize T-shirt next to his oversize abdomen to demonstrate the inadequacy of the State Department budget enacted by Congress. There was validity to his complaint. The demonstration of inadequate sources for substantial needs also symbolizes American policy toward Africa.

Africa is in crisis, desperately in need of increased American aid -at least a tripling of aid, according to one authoritative study - and its problems are getting worse be-cause of some of the world's highest birthrates. But the United States has responded with cuts in aid, and has compounded the fundamental problem of overpopulation by cutting off all funding to the two most effective programs—those of the International Planned Parenthood Federation and

the UN Fund for Population Activities. Two themes repeated by Mr. Shultz on the trip were the importance of self-help and avoidance of dependence on aid. Over and over again on the six-nation tour he appealed for a new emphasis on the private sector, which has been strangled by regulation and competing state enterprises in many African nations. Fair enough. But no amount of reform can solve the problem in inadequate investment and aid. Nor will enhanced private sectors pay Africa's debts that, although small in comparison with the obligations of Latin nations, total an incredible \$162 billion. Repayment and debt service are consuming one-third of the ex-port earnings of the debtor nations. Perhaps the secretary will have seen enough now to support additional money for next year's aid budget in which Africa is slated for only 5 percent of the total.

OPINION

Should West Germans Really Get More of the Same?

By Christoph Bertram

HAMBURG — By all expectations, the elections on Sunday will return to power the same government that has ruled the Federal Republic for the last four years. "More of the same," is the slogan of Chancellor Helmut Kohl's Christian Democrats, and that, in all likelihood, is what West German voters want and what Europe will get: Four more years of a steady if lackluster regime in Bonn, firmly committed to the Western alliance and otherwise intent on maintaining the pleasant status quo.

There is, on the surface, nothing wrong with

this attitude. West Germany is doing well economically, and while the West may be entering a period of protracted economic turbulence, the country has enough accumulated strength to last it out. Yet at the same time West Germany is uniquely vulnerable. Part of a divided nation that is carrying the mortgage of the Nazi years, it needs the Western and European framework of support, particularly when the going gets rough. But during the last four years the Kohl government has preferred to draw on assets

rather than invest in the future.

In particular, it has shown a marked insensitivity to a fact that is now recognized as a truism by neighbors but is still ignored by most Germans: that, in economic terms, the Federal Republic today is Europe's superpower. As other superpowers have found out, strength all too easily begets resentment.

There are a number of good reasons why West Germans have found it difficult to accept their newly dominant position and take it into account in shaping policy toward their neigh-

bors. For one, not least because of the megalomania of Hitler's Reich and the fate it suffered, Germans harbor a deep uneasiness about being powerful. West Germany's postwar experience has been that of an applicant who wishes to be accepted, not that of a leader who seeks to impress others. West Germans like to think of nselves not as a powerful but as a mediumsized state beset by problems of its own — dependent for its security on American troops and missiles, for its ties with East Germany on Soviet acquiescence and for its prosperity on fickle world markets.

Moreover, as the country's international weight has increased, Bonn has discovered the tactical advantage of putting its light under a bushel. By maintaining a low profile, successive governments have sought to deflect undue for-eign demands on their purse. The initial reaction to inquiries of support from West Germany's partners is that these are unjustified. Why, people ask, should we bail out those who have worked less, invested less, exported less and saved less than we have? If governments have tended to be cautious in taking initiatives within the European Community, it has not been only for lack of ambition but also for fear that the bill would ultimately end up in Bonn.

Yet power has caught up with Germans whether they like it or not. For Bonn to plead inability is interpreted today in other capitals as unwillingness, as a refusal to accept the respon-sibilities that power and success convey.

Perhaps the first postwar leader to understand that a strong rather than a weak West Germany runs the risk of being isolated in Europe was Helmut Schmidt. Before taking major action, whether in establishing the European Monetary System or in calling for Ameri-can missiles to balance what he saw as a new threat from the East, Mr. Schmidt always sought to form a coalition with others, preferably with France. And he worked hard at promoting a network of European consensu His successor, Helmut Kohl, who has been

chancellor since 1982, promised continuity in foreign policy when he took over. Indeed, offi-cial contacts between Bonn and Paris have rarely been more intense than in the last four years. But they coincided with the growing trend of Euro-Intigue which has finally caught up with the Germans. Like most of their neighbors, the Germans have become inward-looking and more nationalistic. Mr. Kohl and his powerful minister of finance, Gerhard Stolten-berg, fully reflect this mood. Despite a torrent of pro-European statements, they rarely won-der how their policies affect the interests of others. Rather, they have strick to the convenient belief that what is good for Germany will ultimately be good for Europe as a whole.

Although convenient, this is a very short-sighted recipe for West German politics. If a reminder of the cost of parachial accient mass

reminder of the cost of parochial egoism were needed, it has been provided by the exchange rate crisis this month and its temporary resolu-

tion. The United States and France had pressed for a reduction of West German interest rates in vain for several months. When the weakness of the dollar and the French franc pushed up the mark, Bonn finally — and with barely concealed irritation—agreed to a marginal revalu-ation. Only now that the dollar is falling and German exports suffering have West German authorities considered reducing interest rates. If this had been done a year or six months earlier, when West Germany's trading partners demanded it, the revaluation exercise might not have been necessary at all. Much positional frietion, particularly with France and the United

States, would certainly have been avoided.

In a recent interview, Jacques Delors, president of the European Commission, had this to say about the role of West Germany: "The more you succeed, the greater your responsibility." If it refuses to recognize that this is the burden of power, the Federal Republic will in the end damage its own interests even more than those of its Western partners. Instead of a prospering West Germany in a cohesive West-em Europe, the result will be an isolated West Germany in a weak Europe.

So "more of the same" is scarcely a sound

guideline for West German policy in the next four years. But will this be clear to the winning old team as it sits down in Bonn after Jan. 25 to chart the future course of the country?

For Republicans, Reagan Million Becomes a Dubious Asset

By Ronald Brownstein

and now chief political adviser to Senator Bob Dole: "I don't buy the notion that you have to present a new vision for America; Ronald Reagan has done that. You have to

show how you fit into that." Mr. Devine was speaking in November. His remarks are already an-tediluvian, having been offered just before the flood of Iran arms scandal revelations overwhelmed the White House and the party.

Forgive him. He was only articolating what passed for conventional wisdom in Republican circles. Up until November, many Republicans expected that no matter who became their next nominee, he would present himself as the man to coninne Mr. Reagan's work.

Then two things happened.
The first was the election on Nov. - an initial test for the re-elect Reagan appeal, which political pro-fessionals refer to as "continuance politics." Barnstorming ferociously, the president did everything be could to identify himself with Republican senators on the ballot.

Several first-term Republican senators based their campaigns al-most entirely on continuance. Most er the Senate has provisions for severance pay. in economic policy," said a Demo-On the morning after election day, cratic campaign strategist. with the Democrats busily tacking

WASHINGTON — As a snap-shot of a bygone time, consid-er this remark by Donald J. Devine, the longtime conservative activist cal professionals, it died an early death last month as the administration acknowledged secret arms sales and diversion of funds to the Nicaraguan contras. "For those who

didn't bear the gong after the elec-tion," said Democratic pollster Pe-ter D. Hart, "they've heard it now."

The gong hexalds a new political era. The Republican Party has been driven more quickly than it would have liked to a watershed it was bound to reach sooner or later.

During the past decade, in elec-tion after election, Republicans gen-erated political voltage from two themes: a populist appeal against big government and a "standing tall" message in world affairs. Last fall's campaigns demonstrated that the anti-government appeal bas, for now, lost most of its power. Mr. Reagan fired all his favorite harbs about tax-and-spend Demo-crats. The voters refused to bite,

largely because the Democrats re-fused to fight. And the public, in large measure because it believes that Mr. Reagan has trimmed the excesses of government, was not nearly as worried about big govern-ment as a decade ago. Mr. Reagan

has unhinged the other leg on which Republicans have rested their case. Whatever further revelations the Senate and House investigating committees unearth, they are un-

likely to produce a portrait of America standing tall against terrorists.

"We got into power more easily than people thought in 1980, based on the political symbolism of Iran—that the Democrats were weaker, more inactive and less clear on what the American image was world-wide," said Republican pollster V. Lance Tarrance, "What's happened m economic policy," said a Demo-cratic campaign strategist.

Now the Iran-contra controversy

with the Iran scandal is at the least though confused and dismayed, still blr. Brownstein writes about politics stand solidly behind the president.

That claim of loyalty has wrapped at his to the Los Angeles Times.

tors we've had, particularly with young people, And I know the Dem-ocrats are auxious to return some of the pain we inflicted on Iran."

The weapons deals have intensi-

fied the need for the Republican Party to develop a fresh appeal. But Republican contenders face a conundrum. Poll after poll shows the general public unhappy with the ap-parent trading of arms for hostages and the subsequent diversion of funds to the contras. But the same polls show that Republican parti-

itself around the ankles of all Republicans grappling with this puz-zle. The demands of the primary will force any Republican to defend Mr. Reagan more vigorously than will be wise for the general election. By hastening Mr. Reagan's depar-

ture from the scene, the Iran arms controversy may tope down the emotional debate over big govern-ment that he has amplified. Both parties may end up concentrating on more enduring issues of inflation, jobs and competitiveness.

Mr. Brownstein writer about politics

Southeast Asia: More Smoke Than Fire Amid the Maneuvering

WASHINGTON — At first glance, fighting along the Chi-e-Vietnamese border this month. and the tough line on Cambodia that emerged from Vietnam's party con-gress last month can seem to have set back a simid improvement of atmosphere in recent months. But a closer look suggests that an apparent hard-ening of positions is tactical and not

hide to escalation. After refusing to discuss the Cambodia question with Beijing for two years, Moscow agreed to address it in October. Vietnam's foreign minister attended the Chinese national day reception in Hanoi, and a Vietnamese table tennis team traveled to China.

C ANBERRA — Until recently, Vietnam's Communist Party was dominated by men who had be-

come politically active in the 1920s. Starting in 1951, this first generation

of revolutionaries, comparable to Russia's Bolshevik or China's "Long

March" generation, were elected to

top party positions at each succeed-

what the spat obscured: the real issue. It was not the cardinal's trip or the criticism but the Vatican's policy of re-fusing diplomatic recognition to Israel and Rome's rigidity in enforcing it.

The Vatican has its reasons for refusing the diplomatic recognition that 82 countries have extended to Israel. And although it manages to have diplomatic relations with about 125 countries, including Communist Poland and assort-ed other tyrannies, those reasons are

judged overriding in the case of Israel.
The Vatican does not recognize Jerusalem as the capital of Israel and wants the city put under some kind of international agreement. The Israelis see this as removing their sovereignty over the city they insist on regarding as their capital, even at the price of being considered somewhat stiff-necked and stubborn.

The Vatican backs the Palestinians' desire for a state. And it feels recogni-

tion of Israel might endanger Christian people and property in Arab states.

Anyway, the cardinal, trying to do a little good, set out on a Middle East trip that incinded Jerusalem and visits to Israeli officials. Weeks in advance he postified the Vations of his receive ables. notified the Vatican of his precise plans but it was not until the last moment that the Vatican officials woke up, or decided to wake up, and instructed him not to visit Israeli officials in their offices. This upset the cardinal, although he took the rap for it, and it insulted Israeli officials, although they played it cool.

If the cardinal was ambushed, as some

of his friends believe, it was not by criticism by some American Jews or even the fact that the statement of criticism was foolishly released before the cardinal had a chance to see it. If there was an ambush at all it was caused by the rigidity of the Vatican bureaucrats. Rigid officials reflect rigid policy and

Letters intended for publication should be addressed "Letters to the Editor" and contain the writer's signature, name and full address. Letters should be brief and are subject to editing. We cannot be responsible for the return of sanoticised monuscripts.

By A.M. Rosenthal

that seems to me to be the issue at the heart. What would have been so dreadful if the Vatican had decided to avoid creating embarrassment and real hurt out of its own error and had been gracious and courteous enough to allow the cardinal go ahead with his scheduled visits to the prime minister and the foreign minister of Israel?

After all, the nations that have diplomatic relations with Israel do business in Jerusalem government offices every day, although only a few formally acknowledge Jerusalem as the capital. It is an unappetizing charade but better than acting as if sitting in an Israeli office would be contaminating.

Did it ever cross the minds of those who canceled the cardinal's visits that Anwar Sadat went to Jerusalem and spoke in its Parliament, forever giving hope that people really were capable of burying hatred and seeing each other afresh, an objective presumably of all religious? And that President Nixon and

Jewish organizations that denounced his

conduct abroad before even he had

stepped out of the airplane returning to New York. Fifty-three weighty Jewish

New York. Fifty-three weighty Jewish organizations, including the World Jewish Congress, B'nai B'rith, Hadassah, the United Jewish Appeal and the Zionist Organization of America, spoke through the Conference of Presidents of Major American Jewish Organizations.

a distinguished and sensitive gentleman

who should have known better. He man-

aged to give the impression that it was

an insult to the American Jewish com-

munity that Cardinal O'Connor, while

visiting Israel, declined to be circum-

cised into Jewish dogma.

Background: Cardinal O'Connor was

asked, by the same folk who are now

jumping on him, to visit Israel. Why? They wished to invoke the good offices of the Catholic Church ("good offices" is a technical term used in diplomatic

parlance to describe organizations — the Red Cross would be an example —

that might succeed in negotiating be-

tween bostile parties to bring on a rap-

organizations, were the status of Jerusa-

and the response to the Nazi Holocaust.

The statement said that, respecting all three, the cardinal had left his critics

disquieted and distressed."

m, the plight of Palestinian refugees

Now everyone knows that there was a

Henry Kissinger changed history by vis-iting top men in Beijing, capital of a country then anathema to America?

And if allowing the trip to go ahead as planned would have turned out to be a diplomatic awkwardness for the Vatican cause of Arab annoyance, so what?

israelis often grump about what they call the double standard: expecting their country to act more idealistically than the countries trying to destroy it and not to do some of the nasty things the large powers do, like sell arms to South Africa. But it is precisely that double standard that is Israel's strength, because it permits it to ask for world support in peace and war, and that is why much of the world does indeed respond.

Is it really asking too much to expect the same double standard, sacrifice of momentary self-interest for richer values, from the other very small state that also stands for very large beliefs? I have a hunch that many Americans

other than Jews do not believe that it is too much, and that among them is Car-dinal John O'Connor of New York. The New York Times.

meetings were to take place.

It did not occur to him - as it would

not have occurred to anyone not a pro-fessional diplomat — that there was a

grave symbolic difference between

meeting Israel's leaders in Tel Aviv, which the United States, and most of the

rest of the world, recognizes as the capi-tal of Israel, and in Jerusalem, which

Israel proclaims as its capital. The Vati-

can sharply reminded the cardinal of the

difference, the cardinal complied with

the Vatican's instructions and his la-rach hosts, taking vociferous offense, announced that they would therefore not greet the cardinal as theretofore planned. The cardinal did the correct

thing (he regretted the misunderstand-

ing), but he also did the gracious thing

But before reaching Jerusalem, he vis-

the refugees. If there is anyone who

ited the Palestinian refugee camps and

spoke compassionately about the plight

can visit those camps without expressing

sadness over them, that man's heart is

made of ice. But the Jewish protesters

claimed that the plight of the refugees was a joint responsibility of the Israeli

(he put all the blame for the misunder

standing on his own shoulders).

By William F. Buckley Jr.

N EW YORK — Cardinal John had to do with the cardinal's inattention o'Connor is good and sore at the to the delicate point of where exactly the

It Would Seem That the Cardinal Was Ambushed

was visiting them in their offices.

How is this possible? Whee! Their homes and offices are in the same build-The excellent Washington Post editoing; sometimes a house is also a home.

Finally, on visiting the Holocaust Museum, the cardinal, intensely moved by this great chamber memorializing human horror, remarked that perhaps that Holocaust "may be an enormous gift that Judaism has given the world." The critics found this statement "disturbing and painful." The cardinal replied that if that is so, "then it demeans my entire theology because mine is a theology of suffering." The painful end of Christ on the cross is, by Christian doctrine, the greatest gift ever bestowed on human-kind. If Morris Abram doesn't know that (he does; he knows practically everything), somebody should send him a catechism before he invites the next Christian cleric to the museum

The distressing aspect of the whole thing is that it is now made to look like a diplomatic ambush: an American cardinal invited to Israel to make Israeli propaganda - concerning the plight of the Palestinians, the locus of Israel's capital and a total secularization of the Jewish sacrifice. Thank God for Nathan Perlmutter, the steady-minded head of the Anti-Defamation League, who de-clined to sign that careless denunciation of the cardinal on the grounds that it was unwarranted.

Morris Abram was quick to explain, after the damage had been done, that and the Arab communities.) On visiting Jerusalem, the cardinal "Cardinal O'Connor is a friend, a powerful voice against anti-Semitism ... We did not censure the cardinal." Well, met Israel's president and foreign minister. This was managed by one of those useful manifies of diplomacy: As far as the cardinal was concerned, he was visit-I am censuring Morris Abram, an old friend for whom I have great respect. diplomatic slipup at the beginning. It ing the dignitaries in their homes. As far Universal Press Syndicate.

LETTERS TO THE EDITOR as the dignitaries were concerned, he The Vatican and Israel

rial "The Cardinal in Israel" (Jan. 14) shows that the Vatican has finally arrived at the moment of truth about its reasons for not recognizing Israel.

All the presended reasons of the past have now proved deceptive and untena-ble: The Vatican has said that it is concerned about Christians in Moslem countries - but when did the Vatican intervene in the unending massacres of Christians by Moslems in Lebanon,

southern Sudan or Idi Amin's Uganda? Israel, Vatican officials have said, has no settled borders. What about Guyana, enezuela, Belize, Guatemala and all the other countries without settled borders but with which the Vatican has ties? A third assertion is that the holy shrines in Jerusalem need international protection. But when were these shrines safer than under Israel?

Instead, the truth is now evident that the Vatican must, for strictly theological reasons, make believe that Israel does not exist. Having preached for centuries that the church is now "Israel," that Jerusalem can be found only in heaven, that Jesus took the place of the Jewish Temple, that the Jews are condemned to eternal, homeless wandering - how can the church now face the embarrassment of finding all this refuted by the simple nce of a Jewish state in Israel,

with a Jewish capital in Jerusalem?
As long as the Vatican faces this problem by ignoring Israel's existence, in-stead of admitting its own errors, Jews should not try to change Vatican policy, but meet it with proud, dignified silence. MANFRED R. LEHMANN.

Israel, Iran and Reagan

Two columns on your Jan, 20 editorial page, "The Central Truth Is That a U.S.-Iran Link Is Crucial," by Jacob Nimrodi, and "Better for Israel to Ad-dress Its Crisis," by William Pfaff, although very different, promote an illu-

sion detrimental to the United States. Mr. Pfaff writes that "the Israelis furnished ideas and means to appease Ronald Reagan in his anxiety to do several impossible things at once: rescue hostages, fight terrorism, find 'moderate' Iranians ... "And Mr. Nimrodi states that "creation of a U.S.-Iranian link is at

the heart of the matter." That is not so. Israel has consistently assisted Ayatollah Khomeini's regime since the start of the Iraq-Iran war, Israel's interest is not to create "better relations between Iran and the West," as Mr. Nimrodi claims, but to see the Gulf war continues weakening the Moslem states around Israel. By its military aid to Iran, Israel maintains pressure not only on Iraq but also on the moderate Arab states supporting Baghdad, namely, Kuwait, Jordan and Saudi Arabia.

The White House has been tricked into serving Israeli aims, expertly pre-sented by Mr. Nimrodi, David Kimche and Al Schwimmer. President Reagan has become a victim of both the internal and the Israeli Jewish lobbies.

Way back in November 1947, then Secretary of Defense James V. Forrestal wrote: "No group should be permitted to influence our policy to the point where it could endanger our national security." Forty years later that danger

ANDREW L. LORANT.

Patient, Pill-Seeker, Client, Valetudinarian, Impatient

By Daniel S. Greenberg

WASHINGTON — From enlight-ened wings of the health industry in America come reports that the term "patient" is losing favor because of its connotation of subordination and stolid

عن الأمل

suffering. A new word is sought.
Whatever else it means, "patient" was descriptively on the mark in the bygone

MEANWHILE

days of waiting rooms deliberately and heavily overbooked to keep the doctor fully occupied regardless of the inconvenience for those seeking medical service.

One was patient or went elsewhere.

But it is humane concern rather than the new competitive economics of medicine that inspires the terminological quest. The underlying assumption — and it is probably a sound one — is that a seeker of medical assistance should not start out with a put-down label that

suggests belplessness, disability or passivity. Modern medicine says that people should actively participate in pro-tecting their own health and getting well when they are sick, and "patient" is the wrong term for encouraging that kind of activism. However, the choices for a replacement word are limited.

Since terms associated with ill health are out of bounds, "sickling" or "suffer-er" certainly won't do, "Valetudinarian," meaning a person of weak or sickly constitution, is a splendid word that might be stretched through common usage to cover all who go to the doctor. But it is too big a mouthful to catch on. If shortened to "valet," it is no better than 'patient" in terms of status vis-à-vis the doctor. Malpractice lawyers often refer to recipients of medical attention as "victims," but the health industry cannot be expected to go for that.

Given the overtly competitive tactics that doctors and hospitals now employ to attract people needing their services. "customer" might be appropriate. Or consideration might be given to "account," which is the word that many business people use to describe those who provide their income. Both those words, however, sound tacky in a professional context. So the tide seems to be moving toward "client" as the preferred replacement for "patient."
"Client" has the advantage of estab-

lished usage in the purchase of professional services. It is a neutral term that links a needful buyer and a presumably expert provider. Lawyers and accountants deal with clients. Why not doctors?

The difficulty with calling a patient a "client" is that the term neglects the shaman aspect in medicine — the magical medicine-man role that even well educated laymen anxiously and hopefully assign to their physicians. All the more reason to jetuson "patient," the references would contend. Enlightened doctoring is in revolt against shamanism, as well as against medical authoritarianism and unrealistic expectations. The public must understand, they say, that medicine's healing powers do not

extend to all the afflictions of mankind. That is easy to say, but for many ailing people the shortfall in medicine's true powers is desperately filled by wishful thinking. Many people dislike going away from a medical examination without a prescription, even if it is useless.

"Client" is likely to make the grade by default, which is a pity. It is a flavoriess word, suitable for the egalitarians of medicine but without a resonance suggestive of the ancient and emotional relationship between healer and help seeker. T.S. Eliot's J. Alfred Prufrock speaks of "When the evening is spread out against the sky / Like a patient etherized upon a table." It would not be the same with an etherized client.

Investment Strategies & Opportunities on the Paris Stock Exchange

An International Conference Sponsored by International Herald Tribune & French Company Handbook Paris, February 9-10, 1987

This major conference will provide financial executives with a complete overview of the Paris Bourse's potential, including specific insights into promising industry and stock selections. It will also examine the impact of denationalization and deregulation as well as the effect of changes in the nature of the Bourse such as the introduction of new financial instruments, greater liquidity and the listings of a wide variety of new companies. To register for this timely conference, please complete and mail the registration form below.

Simultaneous translation will be provided at all times.

Strike it rich in Canada's Favorite Lottery. You pick your own numbers playing Lotto 6/49

That's right ... you can win millions by picking your own numbers playing Lotto 6/49—Canada's most popular Government Lottery. In fact, last year Lotto 6/49 paid out \$354,736,589.00 in ALL CASH PRIZES. And it's all free of Canadian taxes. There are two draws each week for a grand prize guaranteed to be not less than \$1,000,000,00 with many millions more in secondary prizes. Grand prizes often run into the millions and have been as high as \$13,890,588.80. Imagine what you could do with that much cash! This is your opportunity to find out because now you can play the lottery that's making so many millionaires in Canada.

WHAT IS LOTTO 6/49?

Lotto 6/49 is the official Canadian version of Lotto-the world's most popular form of lottery. It's the lottery in which you pick your own numbers and it's called "6/49" because you select any 6 of 49 possible numbers from 1 to 49. Your numbers are entered in the Lotto 6/49 computer system and if they match the six winning numbers chosen in the draw-you win the grand prize. Or if you have only 3, 4 or 5 numbers correct you win one of thousands of secondary prizes available.

HOW CAN I PLAY?

Complete the attached order form and send it to Canadian Overseas Marketing along with the necessary payment. Your numbers will automatically be entered for the specified length of time You may select from 1 to 6 games for 10, 26, or 52 weeks. Each game

gives you another chance at the grand prize for every draw in which you are entered. You receive a "Confirmation of Entry" by return mail acknowledging your order and indicating the numbers you have selected as well as the draws in which they are entered

HOW DO I KNOW WHEN I WIN? You will be notified immediately when you

win a prize of \$1,000.00 or more. Also, a complete list of all winning numbers will be sent to you after every lenth draw so that you can check along the way to see how you are doing. At the expiration of your subscription you will be sent a final statement of your winnings. All prize money will be converted to any currency you wish and confidentially forwarded to you anywhere in the world.

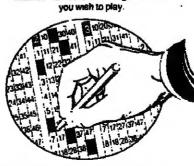

So mail your order today—the next big winner could be you.

PRIZE BREAKDOWN (Actual Sample of One Draw) PRIZE VALUE \$13,890,588,80 1 2ND PRIZE 5443,481 60 10 716 53,794.70 48.917 \$139.30 STH PRIZE JOUTOF 6 TOTAL PRIZES 1,014,756 TOTAL PRIZE VALUE \$37,443,228.10

NYSE Heads Lower; Dow Slips

NEW YORK — Prices on the New York Stock Exchange were lower late Wednesday in active trading after blue-chip issues followed the broader market down.

The Dow Jones industrial average, which rose 1.97 points Tuesday for its 13th consecutive gain — record — was down 2.11 to 2,102.36 at 3 P.M. Losers led gainers by about a 3-2 ratio. Volume at 3 P.M. was about 158.1 million

Although most U.S. stock market tables in this edition are from the 4 P.M. close in New York, for

shares, down from 194.05 million in the s period Tuesday. Prices were mixed in active trading of Ar

can Stock Exchange issues.

"The market is acting toppy but that does not mean it's topped out yet," said Jon Groveman, head of equity trading at Ladenburg, Thalmann & Co.

Mr. Groveman said signs of a "short-term market top" can be read in the smaller number of advancing stocks and in investors' preference for the large companies whose stocks make up the Dow industrial average.

"Traders are physically tired from the releat-

"Traders are physically tired from the releat-less activity on Wall Street since the beginning of the year," he said. "Wall Street's mood is conflicted. It is too soon to sell, but on a trading basis it may be a little bit late to buy."

The stock market was mixed for most of Wednesday's session after blue-chip issues

erased sharp morning losses and advanced while the broad market lagged.

Traders said foreign buying and expectations that West Germany's Bundesbank would cut its discount rate Thursday helped prices while profit-taking and futures-related selling pressured them. In early trading, stock index futures prices traded at a discount to their underlying cash indexes, prompting arbitragers to buy the futures and sell stocks.

"The market is going through some price swings as traders try to interpret the underlying kinetics of this drive, but leadership remains quite strong in the economy-sensitive issues," said Eugene Peroni Jr., head of technical research at Janney Montgomery Scott in Philadelphia. "We are not yet at the point where we will be subject to a sharp or prolonged retreat."

Mr. Peroni said some stocks that are components of the Dow industrial average and that have had strong advances could lose 5 to 7 percent of their current values in a decline. But he said the Dow industrial average overall would not lose more than 3 percent of its value before "it jaunts along to new highs in another errors under"

before "it jaunts along to new highs in another

THE STATE OF THE S

THURSDAY, JANUARY 22, 1987

WALL STREET WATCH

After Gains, Market Seems Ready to Catch Its Breath

By VARTANIG G. VARTAN

New York Times Service

EW YORK - Whenever stocks move sharply in one direction or another for a sustained period, Wall Street's eyes inevitably turn to the giants of the market, the institutional investors, for a reading of what to expect next. What the investors are saying is that, after 13 straight days of moving forward, the market is ready to catch its breath and may well dip in the days and weeks ahead.

indeed, the huge gains so far in January have made some money managers turn cautious. The Dow Jones industrial average moved ahead 1.97 more points Tuesday to 2.104.47, making for a total advance of nearly 210 points since the year-end. "I think the market is setting it-

But barring a bond

crash, one manager

prices is unlikely to

exceed 10 percent.

said, any dip in

self up for a correction on the order of perhaps 10 percent," said Martin D. Sass of M.D. Sass Investors, which manages \$2.8 billion.

"I can still see this move carrying the Dow to 2,150 or 2,200 before the correction comes. But, after that, my ulti-mate target is only 2,300 by year-end."

One reason for January's stunning advance, he added, is "panic buying" by some money managers who entered the new year with too much cash. Because most portfolio managers have inderperformed the broad market averages for the past two

years, they are afraid of missing a big rally.

But Forstmann-Leff Associates, a firm with a good performance record, has been raising cash for the past week even as stock prices continued to advance, "We simply think the market is fully valued at these levels," said William F. Harnisch, the president of the firm, which manages \$4.6 billion.
"We went into this year 80 percent invested, and for us, that's

bullish," he said. "Currently, we are approaching a cash position of 75 percent and we're still raising cash. For example, we sold some of our Price Co. stock and also have sold Raiston-Purina.

Genentech remains our largest position."

Mr. Harnisch also said that any correction in stock prices in coming months was not likely to exceed 10 percent, "provided there is no big crash in the bond market."

OWEVER, David Dreman, the managing director of Dreman Value Management, remains resolutely bullish and keeps the \$2.5 billion under his command fully invested. "I believe it is more dangerous to be out of this market than in it," he said. "Bull markets like this one are few and far between, even though there will be bumps along the way."

One view gaining popularity is that stocks that can respond to a revved-up economy should outperform the interest-sensitive sectors such as electric utilities that have benefited in recent years from declining interest rates. "This market has to be driven by

improved earnings in order to go higher." Mr. Martin said.

As a result, some firms such as Alliance Capital Management
Corp. are changing their mix of investments. Dave Williams,
chairman of Alliance, which manages \$30 billion in various
portfolios as a substidiary of the Equitable Life Assurance Society, said. "Our portfolios have been shifting moderately away from consumer-oriented groups like the foods and tobaccos

toward sectors that are more economically sensitive.

"We also favor groups that, in the past, were hurt by the high value of the dollar," he said. "These include capital goods, papers, chemicals and technology issues." As a matter of policy, Alliance tends to remain pretty fully invested and it does not record itself as "treaches timinal" firm. regard itself as a "toarket-timing" firm.

Peter Lynch, portfolio manager of the Fidelity Magellan Fund, and \$8.4 billion in assets. Over the past 5, 10, and 15 years, his

fund has shown the best performance of any mutual fund.
"Eighteen months ago, 20 percent of the fund's assets were in bonds and utility stocks," he said. "Now that's down to 5 percent. We also have cut back on our investments in foreign automobile stocks."

Salomon To Boost Asia Unit

Will Inject \$300 Million

TOKYO — U.S. investment bank Salomon Brothers Inc. will increase the capital of its Asian affiliate by \$300 million, almost tenfold, Salomon's president. Thomas W. Strauss, said Wednes-

The current capitalization of Salomon Brothers Asia Ltd., which is based in Tokyo, is 5.1 billion yen (\$33.44 million).
Mr. Strauss said the increase

would make Salomon the fifthlargest securities company in Ja-"Salomon Brothers is deter-

mined to be a leader in this market as we are in other markets," he Staff at the Asian affiliate will

rise to 250 or 300 in 1987, from 190 at the end of 1986, Mr. Strauss said. "The fastest growth in recent months has been in our equities staff and we are now among the top three foreign traders of Japanese equities," Mr. Strauss said.

"We are also adding profession-als in corporate finance, capital markets, fixed-income sales and bond trading."
With continuing Japanese government budget delicits and the

growing internationalization of Tokyo, the volume of trading in yen bonds will increase, Mr. Strauss

He said he hoped that Salomon's activity in the market would rise by 5 percent a year. The company did not intend to buy a Japanese secu-rities firm, he said, and preferred to expand from within.

The capital increase is partly based on the expectation that the Tokyo markets will become more open to foreigners, Mr. Strauss

He urged that more foreign firms be allowed to join the Tokyo Stock Exchange, that a greater propor-tion of government bonds be allocated to foreign members of underwriting syndicates and that foreign securities companies be allowed to deal directly in foreign exchange.

Specter of Joblessness Jolts Japan

Nation Struggles With a New Idea: Job Insecurity

By Susan Chira
New York Times Service
MURORAN, Japan — Hideaki Nara, 38 years old and out
of work, sat in the unemployment office of this northern industrial city and stared at a card describing a job at a textile fac-tory. The job would require him to move away from Muroran, where he lives with and supports his parents, and it would pay him less than he received as a welder with the steel company Nippon

Once a boom town, Muroran has begun a slow and seemingly irreversible decline. Mr. Nara, who had expected to work at his company until retirement, lost his job this fall after 18 years; he knows that if he wants to work, he'll have to make some sacri-

"I saw this job last month and thought I would try to wait for something better," he said. "But now I'm settling for this, if I can get it. There's no future in steel."

Suddenly, the specter of un-employment is a national obsession. Faced with unprecedented competition from emerging eco-nomic powers such as South Ko-rea, and finding their price and wage competitiveness reduced the strong yen, a number of old-line manufacturers — chiefly coal, steel and shipbuilding com-panies — have announced plans to trim jobs.

The prospect of any disrup-tion in Japan's cherished lifetime employment system is deeply un-settling here. Although the sys-tem was largely a creation of the postwar era, and although it covers no more than about 15 percent of Japan's workers, it is an important symbol of the cooperative labor-management relations that have contributed so much to Japan's economic pro-

"Japanese corporations will have to muster all their resources or company loyalty will be lost," said Kazuo Nukazawa, director of the international economic department of Keidanren, Ja-

have responded to financial pressures with round after round of layoffs, everyone from company executives to assembly-line workers seems to believe that Japan's basic system of job security

"Firing comes as the ultimate, last resort," Mr. Nukszawa said. "Executives will sell their houses and paintings before firing people. And if workers see that executives are rallying around for their welfare, that will ensure their sense of obligation to the

company."
Nevertheless, some changes are inevitable. Workers over 55 will face more pressure to retire early, and these older workers will have trouble finding new

jobs in an economy that increas ingly demands technological skills. Young people will have more trouble finding jobs as companies restrict new hiring. Companies may be forced to cut back on benefits and scale back the seniority wage system.

Unemployment in industrial regions such as Muroran is likely to increase. Unions may lose power as membership shrinks. and some experts suggest that labor unrest may result if the accord that unions have struck with management — labor har-mony in return for job security

By American standards, the fears may seem exaggerated. Japan's jobless rate is 2.8 percent, actually down from 2.9 percent See JOBLESSNESS, Page 13

U.S. Inflation Was 1.1% in '86, A 25-Year Low

last year, the Labor Department reported Wednesday, the lowest U.S. inflation rate in 25 years.

عملاً من الأمل أ

The 1986 increase in the Consumer Price Index was the smallest since the 0.7 percent rise in 1961. For December, prices rose 0.2 per-cent compared with November, when they edged up 0.3 percent. But the 1986 figures were skewed by a 60 percent fall in crude oil

prices that pushed down retail gas-oline prices by 30.7 percent and heating oil prices by 29.9 percent. Without those decreases—

brought on when the pricing struc-ture of the Organization of Petroleum Exporting Countries col-lapsed into a free-for-all last winter - consumer prices for the year would have risen 3.8 percent, the department said. By comparison, wholesale prices

in West Germany, a key measure of inflation there, fell 4.8 percent for the year, thanks largely to the plunge in energy prices compounded by the decline in the dollar's value. Oil purchases are paid for in dollars. For the 12 European Community countries, the average inflation rate was running at 3.4 percent

Except for energy, U.S. consum-ers found little relief. Prices rose 5.8 percent for new automobiles, 3.7 percent for food, 1.8 percent for housing, 0.9 percent for clothing and 3.4 percent for entertainment the government said. Used car prices fell 5.1 percent. The White House is forecasting

that consumer prices will rise 3.8 percent in 1986, identical with 1983 and 1985. Most private economists predict the rate will be closer to the 4 percent of 1984.

The figures for December indi-cated that inflation is creeping back up. The December rise of 0.2 percent is equivalent to an annual inflation rate of 2.9 percent. Energy prices, which had held steady in November despite in-creases at the wholesale level, be-gan rising last month, when OPEC

Compiled by Our Staff From Dispatches reached a six-month pricing ac-WASHINGTON — U.S. con-cord. Gasoline costs edged up 0.7 sumer prices rose just 1.1 percent percent and home heating oil prices rose 0.7 percent.

Crade prices fell from \$28 per barrel in November 1985 to below \$10 last July. But they have climbed back up to \$19 a barrel in

recent months.

In addition, the continuing de-cline of the dollar against the Japa-nese ven and the Deutsche mark is expected to produce higher prices for imports.

In a separate report, the Commerce Department said U.S. homebuilders had their best year last year since 1978, the government reported today, with work started on 1.81 million homes and apart-

New home starts surged 13.7 percent in December after falling a revised 2.6 percent in November. (AP, UPI, Reuters)

Economists See Tepid Rise in U.S. GNP Rate

New York Tones Service **NEW YORK** — Economists predict that figures released Thursday will show that the U.S. economy grew at only 1.7 percent to 2.7 percent in the October-December quarter.
The Commerce Department

is to release fourth-quarter fig-ures on gross national product the nation's total output of goods and services.

"The economy hasn't done much more than muddle along," said Allen Sinai, chief economist for Shearson Lehman Brothers, who predicted

1.7 percent growth.

Douglas P. Handler, senior economist with Wharton Econometrics, said: "In light of our forecast of about 2 percent GNP growth, we see the fourth quarter as being the weakest for the next year or so."

Key Rate Cut Seen Likely By German Bundesbank

By Ferdinand Protzman International Herald Tribuna

FRANKFURT — West Germany's Bundesbank, moving to placate mounting calls from home and abroad that it help rein in the buoyant Deutsche mark, will cut its key discount rate by a half point Thursday, senior Frankfurt banking Bundesbank to help buoy the dolsources said Wednesday.

"An interest-rate cut is long

overdue," said a senior dealer for a

The dollar rises in active European trading. Page 13.

West German bank. "I think the beavy pressure on the dollar and the domestic political situation are the main reasons the Bundesbank will cut the discount rate now."

said the discount rate, the rate from which bank lending rates are scaled nt from 3.5 percent at the regularly scheduled meeting of the po-licy-setting central bank council. At the same time, the sources said, the council is expected to try to clamp down on excessive money supply growth by lowering the cen-tral bank's rediscount facility and possibly mising banks' minimum

rate on March 6, 1986, cutting it by interest rates be lowered.

half a point. At the same time, the Bundesbank cut the rediscount facility by 5 billion DM, to 58.3 bil-

iion DM, effective May 1, 1986.

A cut in the key West German rate would come against a back-drop of increasingly strident calls lar and calm currency markets.

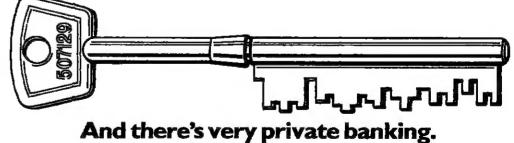

For the past year, the Reagan administration has pressed West Germany and Japan to lower their key interest rates to stimulate do-mestic demand. Washington had sures, combined with the dollar's weakness, would result in an increase in U.S. exports while making imports more expensive.
Until recently, the Bundesbank

and Chancellor Helmut Kohl's A cut in the key discount rate conservative government have would, in theory, stimulate West firmly refused to cut rates, civing German domestic demand by mak- persistently excessive money suping borrowing less expensive. In so doing it would help buoy the dollar — and help trim West Germany's trade surplus — by creating a bigger market for imports.

Sometimal trial and the inflationary plays it presents. The government has made price stability the foundation for its policy of slow, steady economic growth. West Germany is the stability that it is the control has made price stability the foundation for its policy of slow, steady economic growth. er market for imports. economic growth. British Gas Posts Loss, but Predicts **Profit for Year**

LONDON -- The newly denationalized British Gas PLC reported a first-half loss on Wednesday but said the results were consistent with forecasts of full-year profit made before its flotation.

It said that on a current cost basis the pretax loss for the six months to Sept. 28 narrowed to £68 million (\$103.29 million) from £100 million the year before. On a historic cost basis, the operating loss was £15 million, in contrast to a profit of £2. million a year earlier.

Turnover fell to £2.59 billion from £2.64 billion.

Before it was sold to the public in November, the company said it expected first-half losses. But it forecast that pretax profit for the year on a current cost basis would rise 6 percent to £836 million from £782 million.

Amdabl Corp. of Sunnyvale, California, introduced \$10 million order from Cellular One for a fourth

Volvo Earnings Down 15% In Quarter, Slightly in Year

By Juris Kaza al Herald Tribun

STOCKHOLM - Volvo AB, the Swedish automotive, energy and food group, reported Wednesday that its fourth quarter operating carnings fell almost 15 percent cut earnings in the crucial North to 1.12 billion kronor (\$181.71 million) from 1.31 billion kronor a year earlier.

In a preliminary report on 1986, Volvo said pretax earnings for the whole year were off slightly to 7.5 billion kronor from 7.6 billion kronor nor in 1985.

Despite the slight downturn in carnings, Volvo said it would propose raising the 1986 dividend to 9.25 kronor a share from 8.50 in

Volvo said that sales in 1986 dropped to 83.9 billion kronor from 86.19 billion kronor in 1985, mainly on lower energy sales.
Sales of Volvo's industrial opera-

tions, including motor vehicles, en-gines and food, rose 10 percent. Volvo did not give sales or unit

production figures for any of its

mobile telephone system in California. The company

said that two Ericsson CMS-8800 systems would be operated by mobile telephone companies in the central part of the state.

Supreme Court on Tuesday to approve the proposal.
First Pennsylvania Corp. of Philadelphia said its
shareholders had approved its proposed merger with
Marine Midland Banks Inc. of New York. The merger

is expected to become effective within a year after

March 1990, when interstate banking will be allowed

a design and manufacturing facility near Dublin. The plant will provide Hadco with a European-based

source of high-density multilayer, surface-mount and other advanced printed-circuit technologies.

He said the European auto industry as a whole would experience a downtum in 1987.

Rate Fluctuations Push Down BMW Revenue by 3.2%

MUNICH - Bayerische Motoren Werke said Wednesday that its world group revenue slipped 3.2 percent last year, to 17.5 billion Deutsche marks (\$9.7 billion at current exchange rates), and attrib-Finansbank Ltd. of Johannesburg said an over-whelming majority of its shareholders approved a proposal by Nedbank Group Ltd. to acquire all of its ordinary shares. It said it would ask the South African uted the fall entirely to loreign-

exchange fluctuations.

BMW, which does not publish earnings figures, said only that parent company profit was again satisfactory in 1986. World group revenue totaled 18.08 DM in 1985. It said that had currency values

remained stable, 1986 revenue would have exceeded the 1985 figure by a considerable margin.

Parent company revenue rose 5.3 percent to 15.0 billion DM, buoyed by lively demand for new and high-er-value models. Foreign revenue rose 6.3 percent to 9.84 billion DM. while domestic revenue edged up 3.4 percent to 5.15 billion DM.

The number of cars sold edged up 1.2 percent to 446,109, with U.S. than 70 percent of the issued capital. Magnum said the closing date for its offer of one Magnum share per sales up 10 percent and Japanese up nearly 30 percent.

CURRENCY MARKETS

Dollar Higher in Active Trading

. LONDON - The dollar ended higher Wednesday in active European trading on what dealers said was short-covering and some prof-it-taking amid widespread belief that the West German discount rate would be cut Thursday.

Uncertainty about the outcome of talks in Washington between the Japanese finance minister, Kiichi Miyazawa, and the U.S. Treasury secretary, James A. Baker 3d, made for caution, however, and supported the dollar, dealers said.

In London, the dollar closed at 1.8470 DM, up from 1.8375 at Tuesday's close. The closing quote was well below the day's trading high at 1.8545 DM in the early morning, after a dollar rally in the Far East

Against the yen, the dollar closed in London at 153.90, up from

The British pound was slightly lower against the dollar, at \$1.5165, mpared with \$1,5190 at Tues-

Banking sources in Frankfurt not be substantiated said earlier Wednesday that the Meanwhile, the

London Dollar Rates

Dealers said, however, that a cut in the West German interest rate, by half a percentage point to 3 percent, was already largely discounted in the market and would not in itself revert strong underly-

ing bearishness toward the dollar. Dealers said a belief that a West German rate cut would have to wait until after federal elections there this weekend had now faded "It certainly looks like they're going to move tomorrow," a dealer with a U.S. bank said.

He and others cited rumors that the Bank of Japan had also decided in principle to cut leading interest rates, although those rumors could

Meanwhile, the market was Bundesbank would cut the dis- awaiting the outcome of the Japancount rate. The sources said the cut ese-U.S. talks in Washington. Few would try to halt the dollar's recent dealers expected the talks to produce an agreement that would be Swiss francs, up from 1.5408.

able to stabilize currency markets,

But dealers noted that a flood of comments from U.S. officials Wednesday suggested that Washington was now prepared to put aside its objective of seeing the dol-lar fall further in the hopes of narrowing the enormous U.S. trade

Paul A. Volcker, chairman of the Federal Reserve Board, reiterated before the Senate Banking Committee his warnings that continuing devaluation of the dollar would mean inflation.

Dealers said that in Wednesday's hectic market a series of U.S. economic indicators had passed largely unnoticed.

Data included a 0.2 percent rise in U.S. December consumer prices after a 0.3 percent increase in November, and a 13.7 percent surge in December housing starts after a 2.6 decline in November. In earlier European trading, the

dollar was fixed in Frankfurt at 1.8506 DM, up from 1.8356, and in Paris at 6.1853 French francs, up from 6.1350.

It closed in Zurich at 1.5508

THE EUROMARKETS

Eurodollar Sector Supported by Rate Talks

By Norma Cohen

LONDON — Eurodollar bonds ended mostly steady Wednesday as investors awaited the outcome of talks between U.S. and Japanese

The talks are appearing likely to produce a round of coordinated nterest rate cuts, dealers said. A syndicate official at a Japanese bank said the market was waiting to hear what Kiichi Miyazawa, Japan's finance minister, would say n a speech Wednesday night.

Street was a service.

REMITMENTS

Eurodollar bonds were supported by the expectation that the U.S. Treasury Secretary, James A. Baker 3d, would pledge support for a sta-ble dollar in exchange for a cut in Japan's discount rate.

Traders said with the Bundesbank's policy-making council

Germany's 3.5 percent discount cent. rate is also considered a likely respouse to stem the mark's rise.

In the new issues market, dealers pointed out that a complex \$160 million offering by Thomson Brandt International BV with war-tants exercisable into marks, was an effort to capitalize on the exchange rate expectations.

The offering, which came with a coupon of 8 percent, was priced at 103% and is accompanied by 400,000 warrants for 61/6 percent DM bonds in the when-issued market, without the warrants, the issue was quoted at around 99

While there was apparently little trade going on in the warrants sep-arately, traders said the bonds, with of 75 million Australian dollars was warrants attached, were quoted by increased to 100 million.

meeting Thursday, a cut in West comparison at a discount of 1 per-

But some traders said that if any currency realignment is to occur, it is likely to be very soon and the long-term objectives of the issue could be defeated.

Also offered was a \$200 million issue of 10-year notes for Austria carrying a coupon of 744 percent and priced at 101.75. Late in the day, the issue was quoted well within its fees at a discount of 1%. Australian dollar issues contin-

ued to attract investor interest. An offering of 75 million Australian dollars, due 1990, for the government of New South Wales was assigned a coupon of 14% percent and priced at 1011/2.

Also, the World Bank's offering

Fear of Inflation

TALKS:

(Continued from Page 1) sistently violated that agreement by

letting the dollar drift.

Mr. Miyazawa reportedly carried a letter from Prime Minister Yasuhiro Nakasone to Mr. Reagan urging that the two countries coordinate policy. The rise in the yen, 10 percent since the October meeting, has caused a serious deterioration in the Japanese economy.

According to the rumors circulating in Tokyo and New York financial markets, the bargain would include a cut in the Japanese discount rate in exchange for a U.S. commitment to intervene in the markets to support a given yen-

U.S. officials say that interestrate cuts in West Germany and Japan would stimulate capital spending and demand in those countries for American goods much as a lower dollar would and help trim the U.S. trade deficit.

They would also make the yen and the Deutsche mark slightly less attractive to foreign investors whose support of the U.S. currency is necessary if Washington is to finance its huge federal budget def-

Mr. Miyazawa said Monday that he and the West German finance minister, Gerhard Stoltenberg, had been in touch on possible joint responses to what they regard as a dollar crisis.

But Treasury officials are expected to seek more than an interestrate cut with Japan.

One possibility would be a delay raising revenue. The theory is that the tax cut would then have the sole

mand - for the next couple of Alfred Herrhausen of Deutsche Bank AG, a leading West German commercial banker with close ties to Mr. Stoltenberg, predicted in Frankfurt that the German central bank, which for months has resisted Mr. Baker's plea that it cut its discount rate, would take that ac-

But now the Baker position may be that lower interest rates, without lower taxes -- another, perhaps stronger way to stimulate consumer demand - would not provide sufficient boosts to the Japanese and West German economies and therefore would have little effect on the trade deficit.

BUSINESS PEOPLE

Reichartz Will Head Ceasars Palace

Caesars World Inc. has named W. Dan Reichartz as president and chief operating officer of Caesars Palace of Las Vegas, the flagship hotel and casino of the Los Angeles garning and resort company.

The New York Times said that Mr. Reichartz, 40, would succeed Donald Allison, who left in October after management discord. J. Terrence Lanni, the president and chief operating officer of Caesars World Inc., has been running Caesars Palace in the interim. Mr. Reichartz has served as vice

president and general manager of the Waldorf-Astoria Hotel in New York since 1985. He previously was president and chief operating officer of The Homestead, a privately owned resort near Hot Springs,

Mr. Reichartz, a native of West Germany, moved to the United States in 1965. He worked for Hilton Corp. from 1965 to 1976.

in August. Even the most dire forecasts see the rate climbing slowly to a maximum of 5 percent by 1995 shocking in a country where unemployment has not exceeded 3 per-cent for 30 years. The civilian U.S.

One possibility would be a delay

Some observers suggest that Janew Japanese taxes aimed at pan may be overstating the probem to deflect growing protectionist sentiment among its trading effect of stimulating economic ex- partners. Others, such as James Abeggien, a noted management consultant, see another instance of pansion - and thus domestic de-Japan's tendency to treat every problem as a major crisis, which belps form a consensus for dealing with problems before they become

insurmountable. A problem undeniably exists: The manufacturing industry lost 260,000 jobs from November 1985 to November 1986.

The maturing of the Japanese economy is the main culprit. Like the United States, Japan is shifting from an industrial to a high-tech, service economy. Industrial workers who lose their jobs often lack the technological skills needed to find jobs in expanding sectors. Job opportunities are further reduced because employers are hiring part-

Japan Has 1.7% Drop In Industrial Output

United Press International TOKYO - Industrial production in Japan fell a seasonally adjusted 1.7 percent in November from October, the Ministry of International Trade and Industry said Wednesday. It said Japan's industrial out-put for all of 1986 will almost certainly be lower than in 1985, and blamed sluggish exports

time workers, who can be laid off during slack times.

caused by the strong yen.

Foreign competition and the strong yen are accelerating these structural changes, slashing profits and reducing Japanese competi-tiveness against rivals like South Korea. Furthermore, the strong yen is forcing Japanese companies to move overseas - which the goverument estimates will cut 800,000 jobs in Japan by the year 2000.

Muroran, built on the now-depressed industries of shipbuilding and steel, illustrates well the

In 1970, at the peak of its prosperity, Muroran boasted a popula-tion of 162,000; now that figure is below 130,000. Hiroshi Iwata, the

day, 10 workers run the station. Toshizumi Yamane, director of Muroran's unemployment office, can recite a long list of companies that either pulled out of Muroran or pressed workers to retire early, including the steel subcontractor Sanko Shokai (116 workers), the shipbuilder Nagasaki Zosen (155 workers) and the steelmaker Nippon Seiko (385 workers). Most of those workers will be unable to find

Now the whole city is trying to prevent Nippon Steel from shut-ting down its remaining blast furnace. But despite the pressure, the company is expected to announce next month that it will close the Muroran furnace, among others.

new jobs in Muroran.

Yet Muroran is still a long way from Lackawanna, New York, or the other distressed cities of the American Rust Belt. For one, the

changes in store for many workers scale of the job cutbacks is much and the measures being taken to try smaller — when the net job loss is tallied up, it scarcely exceeds 1,000.

When Nippon Seiko cut its Mu-roran work force by 1,000, for example, it moved 600 workers to jobs in other plants. The remaining mayor, remembers when the rail-road station employed 500 workers to handle the crush of traffic; to-payments.

In Muroran, as elsewhere, com panies go to great lengths to hold down costs and avoid layoffs. In its most recent survey, the Labor Min-istry found that 28 percent of Japanese companies had cut overtime. given workers longer holidays, or transferred workers to other divisions or affiliated companies. Only I percent asked them to retire vol-

Many companies rely on an intricate petwork of relationships, known as shukko, to absorb excess workers. A large company will transfer employees to another com-pany with which it has some special relationship — a supplier, for example, or a company that is backed by the same bank. Transferred workers get their full pay; generally their new employers pay their basic wage, and the parent company

IRON & SILK

By Mark Salzman. 211 pages. \$16.95. Random House, 201 East 50th Street, New York, N. Y. 10022.

Reviewed by John Gross

T N 1982 Mark Salzman, fresh from studying Chinese at Yale, arrived in China for a twoyear stint teaching English at a medical college in Changsha, the capital of Hunan Province. His first impressions were unpromising. Changsha turned out to be dirty and drab; the college campus was a mass of gray concrete "mired in a swamp of loose bricks, cinder-blocks and grey mud," and the heavy hand of officialdom seemed omnipresent.

Yet Salzman was quick to gain the confidence of his students, and in no time at all he was being drawn into the true, unofficial life of the college, the city and the countryside be-yond. His record of the two years that fol-lowed, "Iron & Silk," is altogether admirable. It takes the form of a series of lightly sketchedin episodes; almost without exception they produce the gulp of feeling you might get from an unusually fine short story, and they rever-berate long after you have put them down. Gratitude and kindness are among the com-

monest of the book's themes. Salzman, using sandpaper and pliers, fixes up a piano belong-ing to an elderly woman that was hacked around by the Red Guards during the Cultural Revolution; her unadorned "Thank you very much" after she has played a few pieces is eloquent with a sense of everything she has been through (a great deal, as we learn) and everything life has taught her.

Or again, Salzman befriends a family of fishermen. After he has given them a charcoal sketch of one of their boats, it is all he can do to talk them out of giving him the boat itself in return. Instead, he persuades them to sing him some folk songs, which they follow up by inviting him to dinner. He brings his cello, and when he gets it out they all gasp and troop across the room "to touch the divine object the red velvet lining inside the cello case." On the other hand, as soon as he starts playing Bach they resume their conversations - dis concertingly, until he recalls "that for the ma-jority of Chinese who are peasants and labor-ers, music is enjoyed as a sort of background cotertainment."

Many of the stories close on a note of pathos, such as the account of the class in which Salzman asked his students, a group known as "the Middle-Aged English Teachers," so write an essay about their happiest moment. One of them described a visit to Beijing and the Peking duck he had eaten in a famous restaurant. Then he confessed that he had never actually been to Beijing — it was his wife. But she often tells me about it again and again, and I

think, even though I was not there, it is my happiest moment.

Inevitably the problems and possibilities of interpreting one culture to another recur throughout the book. Sometimes they yield moments of comedy, such as the conver in which a student tries to explain to Salaman how much he misses home cooking. ("Don't you always tell me how much you dream of milk trembles?" "Milk shakes." "Milk *)

Learning plays as large a part in "Iron & Silk" as teaching, and perhaps the most metaorable episodes in the book are those in which Salzman appears in the guise of a pupil rather than an instructor. It was the television movie 'Kung Fu" that first fired his curiosity about China, he tells us, when he was 13; he has been interested in wushu, the traditional Chinese martial arts, ever since, and while he was in Changsha he was lucky enough to be taken on as a student by Pan Qingfu, the former national wushu champion and one of its foremost living exponents. (He was, in fact, the first

private pupil Pan had ever accepted.)
Salzman had other wushs teachers while he was in China, and he writes about them well. But his portrait of Pan inevitably predominates — the portrait of a fiercely demanding master who is by turns fearsome and protec rive, a spellbinder who draws strength from his eyes no less than from the legendary "iron (ist he developed by punching an iron plate nailed to a concrete wall thousands of times a day.

In a book that is generally modest in tone there is a justifiable exultation in Salzman's account of how he eventually mastered one of the most difficult of the martial arts, the long sword. But his achievements as a teacher seen to have been no less remarkable; faced with classes that had been browbeaten by endless dos and don'ts, he succeeded in getting his students to unbend, to use their imaginations and overcome their shyness.

"Iron & Silk" records many unpleasant experiences as well as beartening ones, and thegovernment cannot be blamed for all of them. (There is a sharp reminder of the prejudice that has been encountered by black students in China, for instance.) Still, on the whole you come away from the book with a heightened sense of the achievements of Chinese culture

Salzman also makes it clear that one of the things that enables the Chinese to cope with government propaganda is their capacity for turning a deaf ear. At an official banquet, during the first hour of a speech of exeruciating boredom, his Chinese neighbor began dozing; during the third hour of the speech he woke up and asked Salzman what he thought of the meeting. When Salzman replied that he thought it was very boring and repetitious, the man stared at him with an expressionless face. "That is because you are listening,' he said, and went back to sleep."

BRIDGE

By Alan Truscott

THE 1986 world champi-lonships in Miami Beach followed an interesting and in-novative schedule, devised by Edgar Kaplan, the editor of The Bridge World. Since no-body likes to travel balfway round the world and spend most of the time in idleness, the plan was to keep everyone the plan was to keep everyone

The knockout stages of the Rosenblum Cup teams event, for example, was run in paral-lel with a Swiss teams event that provided one semifinalist

Second in the Swiss teams event, and therefore fourth overall, was a star French

group headed by José Da-miani, one of the world's lead-ing bridge administrators. One of his teammates, the former world champion Michel Per-ton, demonstrated his defenron, demonstrated his defen-sive skill on the diagramed

Normal bidding led to four pades, and Perron as West led the heart king. He know that his partner held very little, but the little could include a trump bonor. He therefore continued hearts, giving South the queen. When he won the first trump lead with the ace, he played a fourth heart and his partner, Paul Chemla, made the vital uppercut with the jack.

. The nine became the setting trick. The uppercut would

Conadian socks via AP

kicked bell out of the sky."

eague matches, more that anyone

apart, and back then footy was litthe more than a license to brawl. Scoring was infrequent and strictly incidental. After 130 years the sport has retained its roughbousing tradition and rudimentary rules.

For 100 mad minutes, two 18man teams battle for possession of a watermelon-shaped leather ball on a massy oval surface twice the area of a U.S. football field, which is 300 feet (91 meters) by 160 feet. A team scores six points by kicking the ball through two white goalposts (no crossbars) at either end. The goalposts are finnked by shorter uprights called behind posts; one point is awarded for kicking the ball between the goal and behind post. While the ball may be carried, dribbled (e.g. in behind) post are posted. bled (as in basketball) or punched (as in nessection) or punched (as in volleyball), the art of footy centers around kicking. Most professionals are capable, on a dead run, of punting the hall 60 yards with either foot — and with pin-

Footy is a remarkably fast-peced, high-scoring game - winning teams average 110 points - in which a runner must immediately surrende the ball when tackled. This hot-potato rule means that the ball changes hands, on average, every five seconds, and these afternoon fumblefears make for four quarters of the most free-flowing football invented. "We go all out for 25 minutes

with no pads, no rest periods, no set patterns or plays," said Sydney Swans runner Craig Davis before a more than 10 million television

(viewen watched at home.

Edberg, Lendl Gain Open Semifinals, As Cash Beats Noah, Masur Wins Again

MELBOURNE - Defending champion Stefan Edberg of Sweden and top-seeded Ivan Lendl of Czechoslovakia powered their way Wednesday into the men's semifinals of the Australian Open tennis

Edberg, 21, romped to a 6-1, 6-4. loslav Mecir of Czechoslovakia in a match that was interrupted by rain

Lendl, seeking his first grass court Grand Slam title, posted a 7-6 (7-5), 6-1, 6-3 triumph over No. 9 Anders Jarryd of Sweden.

Also advancing to the semifinals was Wally Masur of Australia, who stopped New Zealand's Kelly Evernden, 6-3, 7-5, 6-4, in a contest between unseeded players. On Tuesday, Masur shocked two-time Wimbledon champion Boris

Becker of West Germany. In the last quarterfinal pairing, 11th-seeded Pat Cash of Australia climinated No. 3 Yannick Nosh of France, 6-4, 6-2, 2-6, 6-0. Cash next

will play Lendl.
With both Cash and Masur posting victories, it was the first time since 1980 that Australia had had two players reach the men's semifinals. In 1980. Kim Warwick and Peter McNamara were semifinalists, with Warwick advancing to the final before losing to Brian Teacher of the United States.

Lendl now has a 7-1 record against Jarryd. too many errors, so I have to be satisfied," Lendl said. "I said at the

afternoon with their faces in meat satisfied," Lendl said. "I said at the pies and lager while watching the start of the tournament that I had a Hawthorn Hawks thrash the Carlgood chance to win it, and nothing has changed my mind." Edberg, who defeated fellow Swede Mats Wilander in the last Australian Open final, in Decem-ber 1985, combined power and

SPORTS BRIEFS

Rich Race Card Established for Britain

ASCOT, England (AP) — In a bid to prevent Europe's top thoroughbreds from going to the United States and Japan in search of prize money,
we in horse breeders have organized Britain's richest-ever race day, with some

3945,000 in purses on a five-race card toward the end of next season.

Sir John Astor, chairman of the newly formed Supporters of British Horseracing, said that the Sept. 26 card will be known as the Festival of British Racing. The feature race will be the Queen Elizabeth II Stakes, a one-mile (1.6-kilometer) race for 3-year-olds and older, which will have total prize money of \$360.000. total prize money of \$360,000.

"We cannot compete with U.S. prize money, but we are following their example," Astor said.

PHCh ()ffic U.K. Soccer Players Warned on AIDS

LONDON (AFP) - Britain's soccer players have been told that their ime-honored customs of kissing on the pitch, taking communal baths and drinking victory champagne from the same bottle expose them to the lisk of carching AIDS.

The Football Association issued all professional, part-time and amateur

players, representing more than 30,000 clubs, with a seven-point document warning them of the dangers of acquired immune deficiency syndrome. In reaction, the English Professional Footballers Association accused the association of "panic mongering." Gordon Taylor, the PFA secretary, said,
"I am very concerned and upset about it. It can do nothing but cause panic
among all football clubs, players and trainers."

For the Record

Greg Foster's time, 7.36 seconds, in the 60-meter high hurdles at Friday's Stnikist Invitational will not be recognized as a world record because of a false start, the governing The Athletics Congress has ruled.

players tend to be lean and sinewy, more resembling hurdlers than linebackers. The reason is that the Bronco Wide Receiver Is Feeling Pretty Super Himself

By Gerald Eskenazi NEWPORT BEACH, California

after five minutes of top-level foc--In the collegiate atmosphere surrounding the Denver Broncos in the days leading up to Super Bowl XXI. it is easy to spot Vance Johnson. Look for his sparkling earrings.
Also, with his Grace Jones flat-

top haircut, his quick smile, his up wearing white loafers without

I'm-having-fun outlook, Johnson socks in 40-degree weather for the hardly looks like a football player team's sendoff to California. who is supposed to be sucking it up for the New York Giants.

This is no ordinary game, after all, for the good people of Denver. So, in the days before leaving Denver, there was Johnson striking a gong on MTV to introduce a rock video or there was Johnson showing

down to who is hot. And Johnson is a hot wide receiver, one of the National Football League's fastest players. In two playoff games, he caught seven passes for 114 yards (a 16.3-yard average), with a 48-yard touchdown play.

That said, other aspects of John-

unpredictable," he explained.

"I dare to be different. Vance is

In the Super Bowl, it often comes

son's life are more complicated. He is an artist, for example, who is obsessed with painting women He has turned down several offers from galleries to buy his paintings. He said he realized that if they were kent off the market, the price evenmally would be driven up.

None of the women in his paint ings smiles - at least not until a few weeks ago. After the Broncos beat the Patriots in the divisional playoff, and Johnson scored a touchdown for the first time, he painted a woman with a smile on her face.

As a rookie in 1985, starting only seven games, he caught 51 passes for 721 yards. But he hurt a knee against the Los Angeles Raiders in this sea son's opener, missed four games af-ter surgery and was undistinguished — until the playoffs.

"It's taken a long time for my speed to come back," he explained. He was distressed with the injury, wondering if his remarkable speed had been affected. He then started dropping passes. As a re-sult, he averaged only 11.7 yards a catch on 31 receptions.

At the University of Artzona, where he majored in commercial art, he won the national collegiate long-jump championship in 1982 with a leap of 26 feet 111/2 inches (8.61 meters). As a running back. he amassed the school's fourthhighest all-purpose yardage total. When one of the National Foot-

ball League's scouting combines timed him in the 40-yard (36.5meter) dash, he was the fastest, at 4.28 seconds. The Broncos drafted him in the second round as a wide receiver in 1985, and timed him at 4.36, fastest in club history.

Getting to the Super Bowl has buoyed Johnson again. Celebrating his appearance, he had his ears merced.
More important for this game, he

is fast. And that may be the key factor in collaborating with John Elway against the Giants' defense. Johnson, with his speed, and Elway, with his scrembling ability, could find open space behind the Giants' secondary. It is a unit geared to keeping receivers in front of them. In the Broncos' game with the Giants this season, Johnson caught three passes for 47 yards. But that was before his ears were

MEN'S SINGLES

ART BUCHWALD

The Brunei Bagatelle

WASHINGTON—Not everything that happened during the Iranian-arms follies was tragedy. There were some light moments, and they deserve to be noted. One of them is when the State Department put the arm on the Soltan of Brunei for \$10 million to

help the contras. The way they tell it in the State eteria, Assistant Secretary of State Elliott Abrams thought up the notion of asking the sultan to hand over a few bucks for

the anti-Sandinist campaign. The sultan is

said to be the . Buchwald richest man in the world, and there is so much oil in his country that Brunei children pour it on their cereal in the morning. The sultan, who is very lonely, agreed to give the money, provided Secretary of State George Shultz would stop by Brunei and say hello.

"No problem," Abrams said.
"Just deposit the \$10 million in this numbered bank account in Switzerland. And Secretary Shultz will be happy to have a cup of tea with you."

Now here is where things start getting funny. The sultan did as he was told, and the money was put in the Swiss bank. But His Highness never got so much as a thank-you note from the State Department. Every time the sultan saw the U.S. sador to Brunei, he winked at him, but the U.S. ambassador

did not wink back.
Finally the sultan at a reception said to the ambassador, "I know it. isn't much money, but could I get a receipt for my \$10 million so I can deduct it from my income tax?"
This started bells ringing in the

Abrams had been getting stories

checked he found out the money had not only been put in but taken out without anyone knowing about

What worries people in Washington is not what happened to the money but what will happen to American relations with Brunei. How can the sultan respect the most powerful nation in the world when it doesn't know how to launder money to countries in the Third

Some people in Washington are also concerned as to how the request to the sultan was made. Did Abrams ask for the money in a nice way, or did he say, "Okay, sultan, give us \$10 million or your tall ship will never pass the Statue of Liber-

ty again."

Other people in Washington are unhappy that Abrams and Shultz may have started a precedent by leaning on oil-rich sultans to finance U.S. wars that Congress doesn't want to pay for.

And then there are those who insist that Abrams sold out the United States too cheap. One expert critical of Abrams said, "Ten million dollars is peanuts to ask Brunei, and it sure isn't worth a stopover by Shultz."

Another question is, why was the State Department using Ollie North's Swiss bank account? Why didn't the State Department have an account of their own in the bank across the street from the American Embassy in Bern? Then embassy employees could watch it in case a Marine Corps lieutenant-colonel or an army general made a withdraw-

Recently Elliott Abrams spent months keeping a Colombian woman correspondent out of the United States because he claimed she was a Marxist. Abrams was so busy making sure she didn't get in that he had no time to devote to protecting the Sultan of Brune's money. The whole thing is embar-rassing, and officials at the State Department have decided the only way to make it up to His Highness is for George Shultz to go back to Brunei and give the sultan a brandnew bank account number if he promises to give the U.S. another

Mary Lee Settle, 'Genteel Hillbilly'

By Myra MacPherson long alienation from a "mean and cold" mother and a bigoted father

Washington Post Service
WASHINGTON — In her throaty voice, the novelist Mary Lee Settle traces her life, an icating ramble that took her far afield from her native South but never free from its grasp. She is, among other accom-

plishments, a National Book Award winner, author of 10 novels, including the "Beulah" quintet (which consumed 28 years of her life), and the current "Celebration," founder of the PEN-Faulkner fiction award and one of the midwives of the Paris Review, but jokes about her "genteel hillbilly" childhood as a coal mine owner's daughter in Kentucky and West Virginia.

"My instinct," she says, "was to get away as soon as possible." She horrified her family by de-fecting from exclusive Sweet Briar College to act and model in New York, married an Englishman there and, when World War II broke out in Europe and he was posted overseas, enlisted in the women's auxiliary of the Royal

Air Force, After 13 months in a control tower in the west of England, she began to suffer from what was known as signals shock - "due to the ceaseless enemy jamming which we were trained to listen through for the pilots' voices" and was transferred to the U.S. Office of War Information in London. She lived through the buzz bombs and V-2 rocket attacks on London and brought nightmares with her back to New York to Manhattan's literary set, which talked of war as if it were an "aesthetic experience.

Then one day in 1945, while a writer at Harper's Bazaar — capi-talizing in part on her modeling days — she returned from lunch with other editors at one of the most fashionable Manhattan restaurants to a layout on her desk of "Brontë Country." Settle stared at the pictures, realizing she had just turned 27 and had yet to write a line of fiction. And that Emily Bronte was dead at the age of 29.
And so Settle quit, to "plunge into
the precarious world of writing."
The bare bones of Settle's life

hide much: the emotional pain of ginia, who couldn't fit in. The who tried to smother their daughter in the desperate conventionality of class. The fierce dedication to her novels. And, for years, the loneliness of the long-distance writer ignored by American critics, even while collecting bouquets in Europe. In between her second and third marriages, there was a painful, obsessive love affair. And a bout with uterine cancer eight years ago.

But, at 68, wry humor rules Settle's conversation. Self-pity is not at home. She is as ready to listen as to talk. She calls herself "a closet Christian . . . now out of the closet." Tall and elegant, with arresting eyes and the ves-tiges of high cheekbone beauty that led her into modeling, Settle - who has written touchingly about long-ago youthful awkwardness — today seems com-fortable with herself.

"Celebration" is in its second printing, she announces. Asked how many books that means, she drawls with an actress' timing. "Honey, I wisely don't ask." And like "Celebration," her life now has a joyous quality and she talks of her third marriage, to William (Witty) Tazewell, a Charlottesville, Virginia, historian and writer, as if she were a teen-ager.

"When you're older, relation-ships are better. You can realize bow important the balance is and you also marry a peer. We women have had 2,000 years of suppressing our egos and we know how to do it. But men don't know how to do it unless they're very secure within themselves. Then, if the woman gets a lot of attention, it doesn't matter. Witty's so secure that anything that happens to me doesn't knock him off base."

In more somber moments, Settle puts it this way: "I have been at war too long - and have yearned for the peace which has now been given me as a gift." The West Virginia mountains

and coel fields that helped shape Settle echo in many of her works, but an international life also threads her writing. Settle was amone the crowd that started the Paris Review in the '50s, that had rejected her suddenly holding forth with George Plimp-ton and company in the cafes lished "The Love Eaters" that

Author Mary Lee Settle: "I decided if failure hadn't stopped me working, I wouldn't let success stop me."

on gray days beside the Seine, What saved me from drugs or drinking and self-importance was having a child to raise. Having to make a living." Without that, said Settle, it might have been different." Her son Christopher Weathershee is a science writer in New Mexico. Her writing talent went unrecognized for years in the United States. From 1945 to 1954, Settle could get nothing published but the magazine pieces she wrote to live on ranging from travel articles to a profile of Somerset Maugham. But she kept writing anyway: "I had the classic drawer full of stories and six plays." She reworked one play into a novel, "The Kiss of Kin," which was rejected by every major publisher in London and New York. But her second povel, "The Love Eaters," was fi-

nally published in London in 1954, to rave reviews in The Observer and The Times. It was, recalls Settle, "the most comple acceptance of a 'first novel' that anyone could dream of."

American publishing bouses

same year and then the previously rejected "The Kiss of Kin" the following year, 1955. Settle was writing furiously by then ("I decided if failure hadn't stopped me problem. I need to be supported. working. I wouldn't let success stop me," she says dryly) and in 1956, Viking published "O Beu-lah Land," the first of the Beulah quintet, five novels tracing Amer-1775 England to 20th-century West Virginia. She traveled back to her child-

hood for "The Clam Shell," her sixth novel, published in 1971, when she was 53. She also wrote was down to \$200," says Settle, when a grant provided money for hell I was." hes to finish writing the book at the University of Virginia.

Throughout her life, Settle has struggled with the pull of the "Celebration": "I was just a little was sustained by a thought she articulated through an Indian character in struggled with the pull of the "Celebration": "I was just a little not known I was a transplant, I own country." had thought I was returning A writer, Settle says, is much home." She labored over volumes the same. "You have to find a

accepting. In 1961 she took a job with American Heritage in New York, but a year later moved to Charlottesville, Virginia. Overcome by a sense of failure and fatigue, she moved in 1964 to Dutchess County, New York, hoping "to be free of the South."

A year later, she was asked to teach a course in American literature at nearby Bard College, a connection that was to last 12 years. She taught one semester a year and wrote two nonfiction books for young people — "The Story of Flight" and "The Scopes Trial." She also finished her memoir of the Second World War, "All the Brave Promises." She had kept no notes, she says, but "I had an old wartime letter and just the feel of that paper in my hands brought it all back as if it were

yesterday."
In 1972, while working on a volume of the quintet called Prisons." Settle went to the Greek island of Kos for no other reason than that it was cheap and warm, then drifted to Turkey, where she lived for three years, starting the book that would change her life.

In 1976, as visiting lecturer at the Iowa Writers' Workshop, Settle did the final rewrite on "Blood Tie," only to have the book re-fused by Putnam. "I was without a publisher after 10 books and over 20 years of publishing." A friend recommended it to ica's revolutionary roots from Houghton Mifflin. Then, in the spring of 1978, "after 14 years of isolation and almost total ne-glect," she won the National Book Award for fiction. With it came advances seven times what they "Blood Tie," which won the Na-tional Book Award in 1978. It among some in New York's literwork and a bit of literary carping takes place in Turkey but was ary crowd who meered, "Who is written in the United States. "I Mary Lee Settle?" Thick as a Plank,' Diana Declines to Play Trivia

Princess Diana told a 15-yearold boy Tuesday that she wasn't elever enough to play the top-selling board game Trivial Pursuit. "I asked her if she wanted a question and she said. 'No thanks. I'm as thick as a plank," said Justian Miles. The princess met Miles while visiting Tadworth Court, a hospital in Surrey for chronically sick, handicapped and terminally ill children . . . Prince Charles. heir to the British throne, will honor the last man to conquer England when he attends a service in France on Sept. 9 commemorating the 900th anniversary of the death of William the Conqueror. A royal spokesman said the prince and his wife, Diana, would attend the service in Carn, in Normandy.

The advice columnist Ann Land. ers, the comic strip soldier Beetle Balley and White House Chief of Staff Donald Regan — "Ronald Reagan's left-hand man" — made a list of the "Ten Dullest Americans." J.D. Stewart, chairman of the "bored" of International Dull Folks Unlimited, also honored the TV newsman Geraldo Rivera for appearing in his "crummy Capone caper and dopey drug bust." Stewart is a Rochester humorist who works as a pricing analyst for East-man Kodak Co. when he is not running his 700-member club.

The Care, a British rock group that angered Arab-Americans with its song "Killing an Arab," agreed Tuesday to place a sticker explaining the lyrics on each album and asked disc jockeys in the United States to stop playing the single. But the band insisted in its agreement with the American-Arab Anti-Discrimination Committee that the song is not racist. "Killing an Arab" is based on a scene in the Albert Camus novel "The Stranger." The song was intend to mirror one of the key incidents in the book: that of the senseless killing of an Arab, on a beach, by the book's protagonist," said a state-ment from the lead singer Robert Smith, co-author of the song. "The fact that it was an Arab who was shot seemed to me totally immaterial, as I imagine it did to Albert Camus. The incident, as I interpreted it, was designed to illustrate the utter futility of the actual action of
